GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aricraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

NAVY GROUND CONTROLLED APPROACH (GCA): Universal frequencies allocated primarily for Navy GCA operational use ,transmitting and receiving. are as follows:

HF Communications	VHF Communications
3475,4890,6640 kcs.	134.64,142.02,143.64 mcs.

Navy GCA Units shall be prepared to control aircraft on the interim U.S. emergency **frequency, 140.58 mcs, transmit and receive. Use of this frequency should be** restricted **to emergencies and routine check of communication equipment.**

In addition to above, Navy GCA Units will be prepared to transmit on HF from 2000 to 18100 kcs, and receive on 1500 to 9050 kcs to aid any plane in emergency.

To promote flight safety, the Navy Department has made its GCA facilities available to civil aircraft for emergency use. Practice approaches by civil aircraft is restricted to multi-engine aircraft because of personnel and equipment limitations. Navy GCA Units shall be prepared to control scheduled aircarriers in emergencies on 140.58 mcs and 3117.5 kcs, transmit and receive. In addition arrangements shall be made to transmit GCA control instructions on tower low frequency either directly or by relay through the tower to aircraft in distress and not able to receive on any other frequency.

Call signs for all Navy GCA Units are the name of the field plus "GCA" Example: "Norfolk GCA"

ARMY GROUND CONTROLLED APPROACH (GCA): (a) CONTACT: Pilots requiring GCA assistance should call the associated control tower requesting instructions for working GCA. Example: "Andrews Tower, this is Army 5555, request GCA". (b) TOWER INSTRUCTIONS: Control towers will ascertain frequencies available to both pilot and GCA, advise the pilot and establish contact with the GCA unit. Example: "Army 5555, this is Andrews Tower, do you have channel G, over" "Andrews Tower, this is Army 5555, channel G available, over". "Army 5555, this is Andrews Tower, establish contact with GCA on channel G, out" "Andrews GCA, this is Army 5555, over". "Army 5555, this is Andrews GCA, your position is now etc.....". (c) EMERGENCY: When receiver and transmitter difficulties exist, the tower may relay Ground Controlled Approach instructions to the pilot. However, from a safety standpoint the procedure should be used as an emergency contingent only. (d) ALERTING GCA: After being inoperative, GCA units require approximately 20 to 30 minutes for warming up. Pilots should anticipate requirement for GCA in flight planning and request alerting of GCA units as far in advance as possible.

C.A.A. GROUND CONTROLLED APPROACH (GCA): The C.A.A. has control tower operated GCA units at Washington National Airport, Chicago Airport and La Guardia Field. Another unit is operated at Indianapolis Airport but is not remoted to the tower. These units are available for practice purposes and emergency use.

RADIO CLASS DESIGNATIONS

AC..... Approach Control Tower, CAA
B..... Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited)
C..... Control Tower, CAA
CA..... Control Tower, Army
CI..... Control Tower (City,County,Private, etc.)
CN..... Control Tower, Navy
D..... Distantly controlled
FM.....VHF fan type marker (100 watts)
FMHW.....Non-directional radio beacon when combined with fan marker.
GCA..... Ground control approach system
H..... Non-directional radio-beacon (homing), power 50 watts or more
ILS.....Instrument Landing System (voice on localizer channel)
IM.....VHF boundary marker
LFM.....VHF fan type marker, low powered (5 watts not over 10 miles from range)
MH.....Non-directional radio-beacon (homing), power less than 50 watts
ML.....Range (loop radiators), power less than 50 watts.
MM.....VHF middle marker
MMK.....Compass locator station when combined with middle marker of Instrument Landing System
MRA.....Range (adcock, vertical radiators), power more than 50 less than 150 watts
MRL.....Range (loop radiators), power more than 50 less than 150 watts
OM.....VHF outer marker
OMK.....Compass locator when installed at outer marker site or within
P.....Point to point radio } 5.5 miles of middle marker
RA.....Range (adcock, vertical radiators), power 150 watts or more
RL.....Range (loop radiators), power 150 watts or more
S.....Simultaneous (range signals and voice) type of transmitter
T.....Teletype
TX.....Principal teletype
V.....Additional voice feature on VHF
VAR.....Visual-aural VHF range (every VAR has simultaneous
VOR.....Visual omni-directional VHF range } voice feature)
W.....Without voice facilities
Z.....VHF station location marker at a range station

N.B. Variation is computed at the station. The distance from station to field is computed from the center of the range station to the nearest edge of the usable area of the airport. The bearing is that from the range station to airport or fan marker.

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radiobeacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Class MH stations operate on request unless otherwise cited. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band. They are installed near airports to make it easier for pilots to make instrument approaches. When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116.1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "B" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis at 15 & 45 minutes past each hour unless otherwise cited.

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

* AT THE BOTTOM OF THE LAST COLUMN, UNDER THE HEADING OF NEW RADIO FACILITIES, BORDERED BY TINTED LINE WILL BE FOUND, OUT OF ALPHABETICAL ALIGNMENT, ALL THE NEW RADIO FACILITIES TABULATED AFTER THE TYPE FOR THAT PAGE HAD BEEN ORIGINALLY SET UP.

N.B. For Digest of A.T.C. and Communications Procedures, see *FLIGHT INFORMATION MANUAL*

AIRPORT DATA
LEGEND

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(NG)	"	-	" WD or State Govt. for Air Nat'l Guard. Ltd svcg. and main. for transient military acft.	
(P)	"	-	Civil airport opened to military acft. (See Note 3)	
☆	"	-	CAA Intermediate Field	

CLASS

SIZE

40: Length of longest landing strip (unpaved) in hundreds of feet
40h: Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 6 miles in length are classified as unlimited and indicated as "unl").

N.B. Only the length of the longest runway is cited, and its direction is not indicated. Space restrictions occasioned this policy, but logic justified it. The logical assumption may be made that runways have been laid out in accordance with the local wind rose. Therefore, in all calms, or gentle-angling winds, or winds aligned with the longest runway, the longest runway will be used. When a wind not aligned with the longest runway is of such intensity that the longest runway cannot be used, this wind makes the use of runway aligned with the wind, even though much shorter than the longest runway, sufficiently long from a safety viewpoint. Too, prior knowledge that there is, for example, a NW/SE runway is of little value to a pilot if, when he arrives over the field the wind is blowing too strongly from another direction to use that runway. Finally, the larger the number indicating the longest runway length, the greater is the assurance of a sufficient number of runways for all-wind coverage.

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3: Range (or homing device), tower, and instrument landing system

LIGHTS

lc: Incomplete lighting, either flood or portable runway lights
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

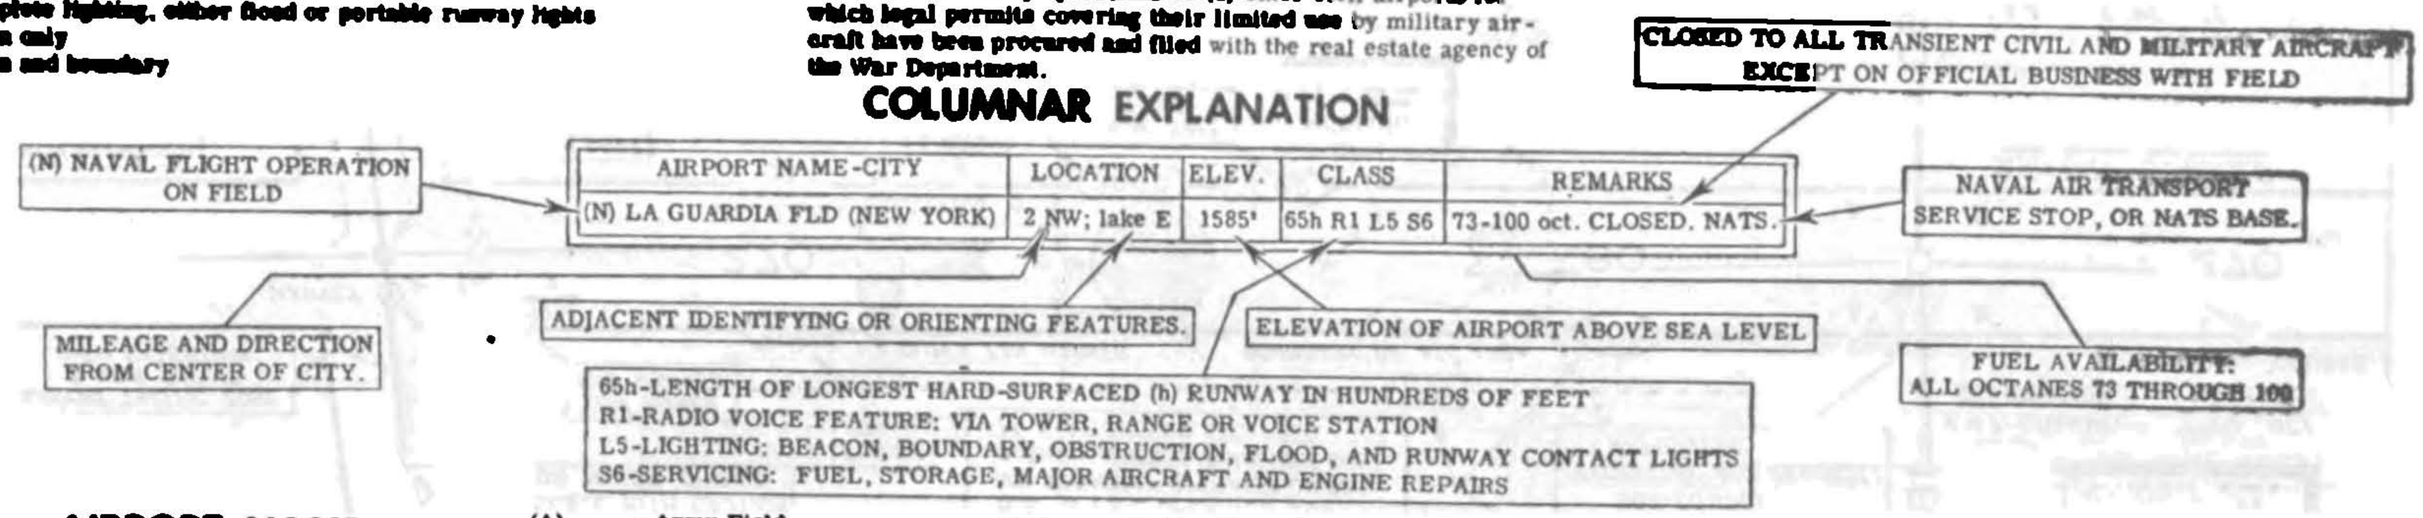
S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

N.B. Very often small civilian fields (particularly in non-metropolitan areas) will have no full-time attendant. Frequently, servicing at such fields in isolated communities is available only by circling the town to attract the operator's attention.
These fields are often recognizable by airport class, comparable to, for example, "1S S1". "1S S1" suggests that the field is not too large, and that the field may not have a full-time attendant even though fuel is stored there. Lack of radio or lighting facilities, indicated by the absence of an "R" or "L" in the airport class, is a further indication that a full-time attendant may not be available. Absence of an "S" (servicing) indicates definitely that fuel, if available at all, is available only by truck from town. Any field carrying no indication of radio (R), lights (L), or servicing (S) in airport class column should be used with caution, especially a field of the small category. Fields of this nature may be inactive or not maintained, and thus dangerous for use.

NOTES

1. "(NC)" not charted. Indicates not charted because of insufficient data or inability to verify
2. → New or revised data. ✱
3. "(P)" in CITY-AIRPORT NAME column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the War Department.
4. "Effingham Int., 10, LS-ID" in CITY-AIRPORT NAME column indicates that the airport is Effingham CAA Intermediate Field, Site 10, on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the CAA are listed similarly except that there is no prefixed star or "Int."
5. In Location column, the word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.
6. In Remarks column:
   (a) "91 oct.", indicates fuel octanes available. "Army", or "Navy" following octane indicates Army or Navy contract fuel available.
   (b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.
   (c) "Port. B-2 lights" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway.
   (d) "TEMP INACTIVE. NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned (See Special Notice).
   (e) "ARMY TEMP INACTIVE. CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.
   (f) "PRIVATE" indicates field is available for owner only, and not to be used by others except in emergency. Only those private fields that are clearly identifiable from the air as airports are listed. Thus many personal use fields are not covered in the Guide because they are not marked or are too small.
   (g) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
   (h) "Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field (and, in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.
   (i) "FEE" indicates landing fee for private aircraft.
7. Airline stop airport names are capitalized or bracketed.

COLUMNAR EXPLANATION



AIRPORT NAME ABBREVIATIONS

FLIGHT PLANNING CHARTS

LEGEND

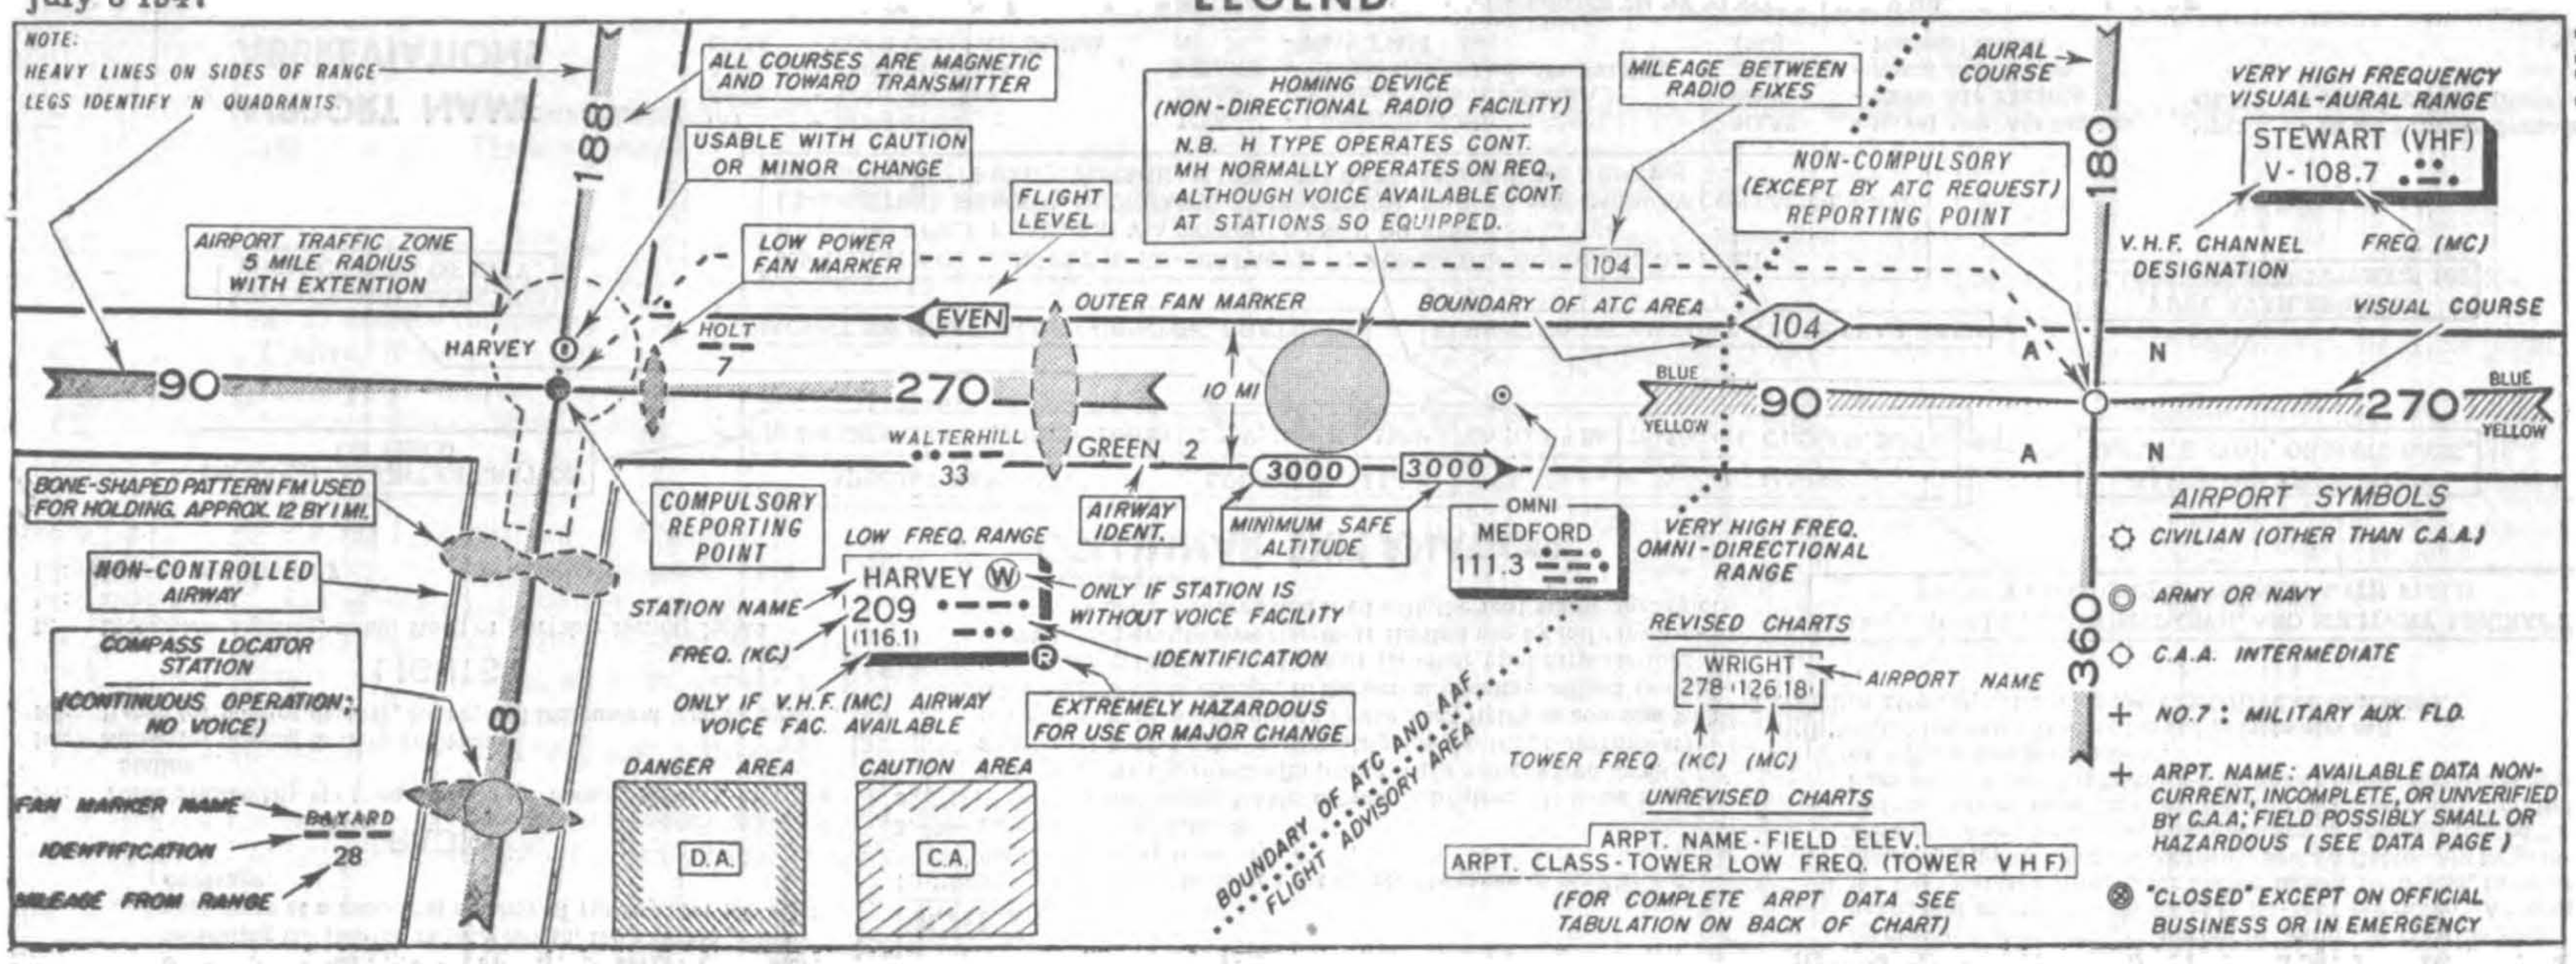

CHART CONTENTS

The Flight Planning Charts, in addition to the warning (R) and caution (O) symbols, indicate: (1) all aeronautical radio facilities except air carrier stations; (2) all minimum safe altitudes and fix mileages; (3) all Army and Navy fields and CAA intermediate fields, and all active civilian airports; (4) all danger and caution areas; (5) all designated airways These charts indicate all facilities, and the current status thereof, on record with the CAA as of 0001 E.S.T. each alternate Tuesday.

CHART PURPOSE AND USE

The primary purpose of these charts is to facilitate the planning and execution of cross-country flights. The user should check the charts for the symboled (R) or (O) items between his point of departure and his destination. If there is none, there is no necessity for him to read the Notices to Airmen section as far as temporary items are concerned. As for permanent changes - all major ones, such as new fields, abandoned fields, range freqnency changes, etc., are currently reflected on the charts. For record-keeping purposes and for the correction of charts and publications, however, the Notices to Airmen section should be carefully read.

VHF CHANNEL LETTER DESIGNATORS

Channel letter designators are being shown on the Flight Planning Charts herein only as an aid to pilots in their use of unmodified military equipment. It is emphasized that not all very-high frequencies now in use have channel letter designators. Standardization of air-borne equipment in this respect has not been effected, nor is it expected to be along the lines of one-letter designators because of the large number of frequencies which eventually will be in use.

CHART HAZARD SYMBOLS

The current status of facilities and hazards as reported to the CAA is indicated by the symbol system. An airport closed because of construction, an inoperative range, a revised range quadrant identification or range frequency, or course realignment of 20° or more, for example, are indicated by the symbol (R) for red, or warning. An airport under construction but usable, or an inoperative control tower, on the other hand, is indicated by the symbol (O) for orange, or caution.

RANGE COURSE LENGTHS

In general, the length of radio range courses shown herein indicates the approximate location where it is expected that a pilot will tune from one radio range to the next one along his route of flight. Such change-over points, however, are not mandatory, and it is expected that a pilot will use his best judgment in selecting change-over points that will best serve his needs.

WARNING

Radio range courses are subject to disturbances that result in multiple courses, and signal fades and surges over rough country. Pilots flying over unfamiliar routes are cautioned to be on the alert to detect these vagaries, particularly over mountainous terrain.

Loop ranges (such as ML, RL, MRL without simultaneous feature) are not suitable for DF and ADF operations DF or ADF use should be restricted to simultaneous type of range stations, H stations, and commercial broadcast stations.

N.B. The attempt to superimpose VHF ranges cartographically upon the low frequency system practically nullified the Guide charts for either VHF or LF navigation.

It was decided, therefore, to give the VHF ranges separate coverage. With the Guide's stringent page limitations, separate VHF range charts necessitated the elimination of the Civil Airways and Mileage Charts. Specific flight advisory and traffic control area boundaries and specific fix mileages, however, may still be found on the indificual Guide Charts.

It is hoped that the mileages tabulated above facilitate flight planning because the addition of small sector mileages is no longer necessary.

NOTICES TO AIRMEN

SPECIAL NOTICES

ARMY DATA: Advice covering Army fields or Army operations on civil fields, or Army radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Army airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Headquarters Army Air Forces, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/gnd communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C. for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction; or merely a burned-out obstruction light or a runway partially unusable because of construction. Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent In other words, a temporarily closed airport is ordinarily of much more importance from a safety angle than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood, or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

USE OF AIRPORTS BY MILITARY AIRCRAFT: (1) AAF REGULATION 85-2: The attention of Army clearance personnel and of Army pilots is invited to the provisions of Section III, AAF Regulation 85-2 and AAF Regulation 85-2A, which state in part: "Except for those Army aircraft assigned to civil contractors or agencies under bailment contract, no Army aircraft will utilize civil airports which have not been leased, purchased, or where AP-4 or similar landing rights agreements have not been negotiated by the Government, except in case of emergency or in case of official business. Each instance of flights in AAF aircraft for official business will be covered by competent air force, major air command, or higher authority orders. Each instance of flights for official business in organic aircraft of the Army Ground Forces will be covered by written orders of the commander of the unit to which the aircraft is assigned. These written orders must designate the field of intended landing. Unauthorized use of such airports is a substantiating factor in claims for damage with accompanying requests to the Government to bear maintenance and repair costs or to provide Government equipment at such civil airports. Notation will be made by clearing authorities in Remarks section of AAF Form 23 that competent authority authorizes ase of such fields and will be transmitted in Remarks Section of the flight plan as 'authorized flight'. All landings by military aircraft without competent written orders on inactive, temporarily inactive Army airfields and civilian airports, except in case of emergency, will be limited to the ones identified by letters "A, N, NG, or P" in the Airman's Guide. It is the responsibility of the various air forces, major air commands and certain field activities under the direct control of the Commanding General, AAF, to prevent unauthorized use of airfields and airports as outlined in this Regulation"

2. "OFFICIAL BUSINESS" within the meaning of AAF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the puspose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

3. POLICY OF ARMY USE OF TEMPORARILY INACTIVE AIRFIELDS: (a) Municipal airfields which have been used jointly by the Army Air Forces and civil interests and at which Army facilities are temporarily inactive but the civil facilities are still active, may continue to be used by military aircraft. No servicing other than that provided by commercial concerns will be available. Such airfields will be identified herein (directory section only) by the following notice: "ARMY TEMP INACTIVE - CIVIL FACS"

(b) Temporarily inactive Army airfields used exclusively by the Army Air Forces (either owned or leased) or municipal airfields used jointly by the Army Air Forces with civil interests at which both Army and civil facilities are inactive will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned. Such airfields will be identified herein (directory section only) by the following notice: "TEMP INACTIVE. NO FACS.". Above policy statement is not to be construed as countermanding any AAF Regulations or letters governing command use of municipal airports or Army airfields.

4. "CLOSED" ARMY AIRFIELDS: Under the provisions of AAF Regulation 60-23, or under specific direction of the CG, AAF, from time to time certain airfields under the jurisdiction in whole or in part of the Army Air Forces will be listed as "CLOSED": Such as, (a) Fields closed to all transient traffic except on official business or in emergency; (b) Fields that have been declared surplus to the AAF and on which permits have not been issued for civil use or which have not been otherwise disposed of by WAA. The listing "CLOSED" will appear in the directory section only. Airfields so designated will be used on official business only under written orders in each case.

CLEARANCE OF AAF AIRCRAFT: National Guard Units are not authorized to clear AAF aircraft. At bases occupied solely by National Guard, clearance for AAF aircraft will be obtained from Flight Service in accordance with provisions of paragraph 2, AAF Regulation 60-22.

ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF Regulation 61-4, Army aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA - Morrison Field, Fla., Washington National Airport, D.C., or Westover Field, Mass. ALASKA - McChord Field, Wash., Great Falls AAF, Mont. BERMUDA - Mitchel Field, N.Y., Morrison Field, Fla.,

Washington National Airport, D.C., or Westover Field, Mass., CANADA - Great Falls AAF, Mont., McChord Field, Wash., Washington National Airport, D.C., Selfridge Field, Mich., or Westover Field, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March Field, Calif., Kelly Field, Tex., or Morrison Field, Florida. CARIBBEAN - Morrison Field, Fla., or Kelly Field, Tex. ENGLAND, GREENLAND, ICELAND, NOVA SCOTIA, NEWFOUNDLAND, AND NORTH IRELAND - Washington National Airport, D.C., or Westover Field, Mass. (Note: Selfridge Field also will clear for Nova Scotia and Newfoundland). HAWAII - Fairfield Suisun AAF, Calif.

PILOT PROCEDURES WITH FLIGHT SERVICE USING AAF MILITARY FLIGHT SERVICE COMMUNICATIONS SYSTEM (PLAN 62): (1) Departure from AAF Bases: No change. References: AAF Regulations 15-23 and 60-22. (2) Departure from non-AAF Bases: AAF aircraft departing from a non-AAF base will file a complete flight plan with, and when necessary, secure approval from, the nearest Flight Service center prior to take-off, or as outlined in AAF Regulation 60-22. Communications with a Flight Service center may be established by direct telephone or by a radio call to the nearest AAF base or AACS airways radio station. After contacting the Flight Service center, and obtaining flight plan approval when necessary, pilots contemplating flight under IFR will secure a CAA Airway Traffic Control clearance. The CAA clearance normally can be obtained more rapidly by contacting CAA direct through CAA communications facilities. However, if CAA communications facilities are not available, the CAA clearance may be obtained through Flight Service. (3) Change of Contact Flight Rule (CFR) Flight Plan Enroute: AAF aircraft requiring a change of route or point of first intended landing of a CFR flight plan enroute will contact Flight Service through an AACS airway radio station or control tower, submit the information required by AAF Regulation 60-22 and, when necessary, secure Flight Service approval. (4) Change of IFR Flight Plan, or CFR to IFR, or IFR to CFR Enroute: Any AAF aircraft requiring a change of route, altitude, point of first intended landing, cruising speed, or alternate airport, or change from CFR to IFR, or IFR to CFR, enroute will contact a CAA communications station for CAA Airway Traffic Control clearance and Flight Service approval if necessary. Pilots possessing clearance authority must furnish Flight Service their new flight plan. If communication with a CAA communications station cannot be established, an AACS airways radio station will be contacted for coordination between CAA and Flight Service and to obtain CAA Airway Traffic Control clearance and Flight Service approval when necessary. (5) CFR Position Reports: When flying under CFR conditions, pilots will make position reports, wherever practicable, to AACS airway radio stations enroute and receive any necessary advisories from Flight Service. One position report each 30 mmutes is considered adequate. (6) IFR Position Reports: When flying under IFR conditions, pilots will first make position reports to CAA communications stations as heretofore required by Civil Air Regulations, and then to AACS airways radio stations en route, and receive any pertinent Flight Service advisories. (7) Voice Calls: AACS airways radio stations will be called by the location name followed by the word "airways", such as "Bolling Airways". This is distinct from the CAA radio call system which uses the location name followed by the word "radio", such as "Washington Radio". (8) RON Messages: At bases not connected with Flight Service centers by military interphone, pilots may file RON messages via long distance telephone to the Flight Service center at the time the arrival report is filed. (9) All VHF equipped aircraft will be provided with a card to be prominently mounted near the VHF control box which will specify button, frequency, and service obtainable. An Index of AACS airways stations within the U. S., together with a listing of the assigned frequencies, may be found on pages 100 & 101 of T.O. 08-15-1. The following table displays the channels and frequencies normally used to contact the various communication installations:

Button	Frequency	Service	
A	116.1 mcs.	CAA AIRWAYS (RANGE STATIONS)	* AACS Airways
B	126.18 mcs.	CONTROL TOWERS	(Plan 62)
C	137.88 mcs.	AACS AIRWAYS (PLAN 62)	* Control Towers
D	140.58 mcs.	MILITARY EMERGENCY & GCA FINAL APPROACH CONTROL	

* Available for service indicated on a secondary basis.

(10) It will be some time before all AAF aircraft are equipped for operation on AACS airways frequencies. It is not the intent that pilots flying aircraft not so equipped attempt to make position reports to Flight Service as described above. Emergency Flight Service advisories, however, may be transmitted to such aircraft on the AAF control tower frequency. Aircraft which are equipped for operation on AACS airways frequencies will contact airways station whenever possible rather than AAF control towers. (11) The following list of telephone numbers will be used for contacting military Flight Service Centers:

CAA AREA	FLIGHT SERVICE AREA	PHONE NO.
Washington; Pittsburgh; New York; Boston	Olmsted Flight Service Center Middletown, Penna.	Steelton 93387 Steelton 93470
Jacksonville; Miami	MacDill Flight Service Center Tampa, Fla.	Tampa H-4871
Memphis; New Orleans; Atlanta	Maxwell Flight Service Center Montgomery, Ala.	Montgomery LD 89
Cleveland; Cincinnati; Detroit; Chicago; St. Louis	Wright Flight Service Center Dayton, Ohio	Osborn 88691, 88604 Osborn 88692
Ft. Worth; San Antonio; part of El Paso	Ft. Worth Flight Service Center** Fort Worth, Tex.	Fort Worth 77251
Denver; Minneapolis; Kansas City	Lowry Flight Service Center Denver, Colo.	Denver LD 116 LD 117
Los Angeles; Albuquerque; part of El Paso	March Flight Service Center** Riverside, Calif.	Riverside 7107 Riverside 7108
Oakland; Salt Lake	Hamilton Flight Service Center Hamilton Field, Calif.	San Rafael 770 San Rafael LD-20
Great Falls; Seattle	McChord Flight Service Center Tacoma, Washington	Tacoma LD-20 Tacoma LD-21

**REVISION OF ARMY FLIGHT SERVICE CENTER AREAS: The boundary between the March and Fort Worth Flight Service Areas has been moved. That part of the El Paso CAA area lying E of the following points now falls within the Fort Worth Flight Service Area; that part lying W within the March Flight Service Area: From 25 miles SE of the Clarendon Range, thence SSW to lat. 33°, long. 101°38', thence W to 33°-104°, thence S to 31°-104°, thence W to the U.S.-Mexican Border at 31°-105°36'.

IFR CLEARANCE OF ARMY AIRCRAFT: Except as outlined below, no Army aircraft will be cleared for instrument flight unless such aircraft is equipped with a low frequency radio receiver capable of reception in the 200 to 400 kc. band. The BC-1206 (Detrola) receiver is not considered adequate as regards compliance with this directive. Aircraft not so equipped may be permitted to clear under IFR when the instrument type clearance is necessitated by reduced local visibility caused by fog, smoke, or haze, or when the flight will not be conducted under conditions which will require navigation by radio.

CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with AAF Letter 63-9 of April 24, 1947, the following instructions will govern the clearance of AAF aircraft to and from the New York City Area (encompassed by a 25-mile radius from the southern tip of Manhattan).

(A) FLIGHTS INTO THE AREA: AAF aircraft flying into the area may be cleared for any authorized field therein, but will in all cases secure in-flight approval from Flight Service by contacting Mitchel Airways prior to proceeding to the field of destination. AAF Form 23 will indicate a flight plan to the field of destination via Mitchel Fld. Mitchel Airways will secure Flight Service approval of further clearance to other fields in the area under the conditions listed below only. If further clearance is refused, aircraft will land at Mitchel Field or at any other authorized field outside the area.
(1) CFR. When the ceiling is at least 2000' and the visibility is 3 miles or more.
(2) IFR (a) When the visibility is not less than 1 mile and the ceiling is unlimited. (b) When the visibility is not less than 2 miles and the ceiling is not less than 5000'.

(B) FLIGHTS OUT OF THE AREA: AAF aircraft departing from the area from fields other than Mitchel will be cleared subject to the conditions listed above for CFR and IFR clearances.

AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exempted from the above restrictions.

SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A, N, NG, or P" fields as an alternate. The selection of an alternate airport is a planned procedure to be resorted to in case of emergency and any suitable airport, military or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A, N, NG, or P" fields under such circumstances may be called upon to justify their use of same.

V.H.F. CHANNEL ASSIGNMENTS:

Following are Army assignments:

Channel	Frequencies
A	116.1
B	126.18
C	137.88
D	140.58
G	137.70
H	134.10
U	108.3
V	108.7
W	109.1

Following are Navy assignments:

Channel	Frequencies
1	116.1
2	142.56
3	126.18
4	128.70
5	143.28
6	134.64
7	143.64
8	142.02
9	142.74
GUARD	140.58

ARMY DISTRESS, AND SEARCH AND RESCUE PROCEDURE: 1. When an aircraft is in distress and the pilot is unable to establish two-way communication on any frequency, he will transmit as follows: "Mayday. Mayday. Mayday. This is Army 1 2 3 4, this is Army 1 2 3 4, this is Army 1 2 3 4, my approximate position is --, Over." Pilot may follow this emergency transmission with any other information he deems necessary. Although Channel "D" (140.58 mcs) has been designated as the Joint Army-Navy emergency frequency, the pilot in distress will use any or all frequencies at his disposal. Communication coverage on various frequencies will vary depending upon the location of control tower, airways, VHF/DF, and other radio stations. 2. To request escort by Air Rescue Service rescue plane when two-way communication can be established, aircraft in distress will: (a) Contact Flight Service through nearest AACS airways station. (b) Give position report; if position is not known, request QTF (Fix). (c) Give nature of trouble, also estimated time plane can remain aloft. (d) Follow instructions transmitted by Flight Service. (e) Follow instructions of Air Rescue Service aircraft after contact is accomplished. 3. To report sighting of crashed aircraft: (Note: Previously reported and identified crashes are marked with yellow paint). (a) Contact Flight Service through nearest AACS airways station. (b) Give position of crash. (c) Evidence of survivors, type and number of aircraft (if possible). (d) Follow instructions transmitted by Flight Service. (e) Immediately after landing make a complete report for transmission to the nearest Air Rescue Unit; also notify nearest Army Air Forces installation.

SERVICING FOR ARMY AIRCRAFT: Transient Army servicing is usually available at active Army airfields and, when available, is indicated in the remarks column, data section by an "S" designation (as defined under data legend) and octane ratings of gas are shown. At airports designated by a single (A) in the "Airman's Guide" (Joint use with civil interests), Army servicing is available unless remarks column carries "ARMY TEMP INACT-CIVIL FACS." Notation is given in remarks column to servicing available for military aircraft: for example, "91, 100 oct. Army". This may be contract service. As a matter of policy, limited servicing and maintenance will be available to transient military aircraft at Air National Guard Fields (on Form 15). Notation with regard to available facilities will be shown in the remarks column; for example, "91,100 oct. NG". At (P) or civil fields, military servicing or Army contract fuel will not be available; servicing may be secured in emergency only on a Form 15. Army servicing may be procured at Navy fields on a Form 15.

GROUND/AIR EMERGENCY CODE: The attention of all Army base operations personnel and Army pilots is invited to WD pamphlet 11-7, subject "Gnd/Air Emergency Code"

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

OLD PILOT CERTIFICATES MUST BE EXCHANGED: All pilot certificates issued prior to July 1, 1945, expired July 1, 1947. Such certificates may be exchanged for new-type certificates at any time prior to their expiration date.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer upon the request of such inspector or enforcement officer.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months, the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers: (1) Discontinue all unnecessary low flying. (2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas. (3) Re-route channels of approach and departure to avoid residential and business districts whenever possible. (4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum. (5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary

---

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission field offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a United States citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S. Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flight should not be conducted on civil airways in IFR weather using VHF ranges unless the ATC clearances so authorize. (See pages 144, 145, 146 for VHF range coverage).

NEW PRIVATE FLIER VHF FREQUENCIES: All CAA Communications Stations and Towers are discontinuing receiving watches on 131.7 mcs. and 131.9 mcs. as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs. for

transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers. Practically all CAA towers now guard 122.8 mcs. but the communications station program is not fully effective yet because of non-receipt of the new receivers. CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs. in addition to towers' low frequencies. See individual data pages in the Airman's Guide for inclusion of these frequencies as commissioned.

U. S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of observation for all weather reports is 30 minutes after the hour, unless otherwise announced. Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

INSTRUMENT FLIGHT, NEW YORK METROPOLITAN AREA: Revised arrival, departure, holding instrument approach and control procedures utilizing new radio aids were placed in effect in New York Metropolitan Area. Non air carrier pilots proposing instrument flight through this area or to or from Newark, Mitchel, or La Guardia Fields should write the Chief Controller, New York Air Traffic Control Center, Box 575, La Guardia Field, New York, for copies of applicable Operations Letters describing these procedures.

✓ NON-COMPULSORY REPORTING POINT: The intersection of the E leg of the Amarillo Radio Range and the NE leg of the Clarendon Radio Range has been designated a non-compulsory reporting point known as "Alan Reed".

CFR FLIGHT PLANS, AND ARRIVAL REPORTS: CFR flight plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over C AA communication systems. If the arrival report is not received within three hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight. To reduce radio congestion, pilots should file CFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting CFR flight plans for transmission and will not normally file arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (a) Correct Milwaukee Sectional Aeronautical Chart, dated Dec. 31, 1946, by showing Muskegon Radio Range transmitting on 263 kcs. instead of 236 kcs.

(b) Correct "TO-08-15-1", dated June 18, 1947, page 106, by showing GCA practices for Mitchel Field as 0900-1130 instead of 0800-1130; page 107, by showing 143.64 mcs under Standard Navy GCA freqs instead of 173.64 mcs.; page 34, by showing weather broadcast at Wendover, Utah, from the radio range only; pages 48 and 49, by showing Tonopah radio range station identification as "RY"; page 110, by showing Special Notice, Standard VHF Crystallization, AAF Aircraft Receivers, Channel H as 134.10 mcs.; by adding under Pilot Procedures with Flight Service using AAF Military Flight Service Communications System, telephone number for Wright Flight Service Center: Osborn 88604; page 26, by showing Aircraft Fuel class for Lockbourne AAB as A-CG.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and light facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Army Air Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with two-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off. (b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AAF Regulation 100-4, dated March 4, 1944, and CAR Digest of Manual 60). (c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate suspension of CFR traffic.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

FOREIGN DATA

SPECIAL NOTICES

✓ FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Volume 2, No. 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the "Airman's Guide".

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom military air bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the United States or the United Kingdom and are in ferry status: (a) For regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana; (b) For alternate use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad. Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters, AAF, Washington, D.C., prior to the departure of each flight or series of flights.

CAUTION ADVISED IN USE OF GUATEMALA-HONDURAS AREA AERONAUTICAL CHART: Flight checks have revealed that elevations indicated on Gulf of Fonseca (710) Aeronautical Chart covering the Guatemala-Honduras-Nicaragua Area, dated December 1946, are as much as 4300 feet too low. This chart base is being thoroughly rechecked and a new chart will be issued as soon as possible.

TRANSMISSION OF INTERNATIONAL NOTAMS: Effective May 10, 1947, the transmission of international notams to Service A circuits by WSY New York was discontinued. Offices desiring receipt of this material should obtain receiving drops on the Service O system.

INTERNATIONAL RADIOTELETYPE CIRCUITS: Effective May 16, 1947, WFM Lagnes, Azores permanently decommissioned. The following radioteletype circuits are established and in operation at CSY Santa Maria; WSY New York; EIP Shannon; FXO Paris; WFH Port Lyautey. Inter-island radioteletype link CSY Santa Maria to WYQY Lagens will be continued until further advised. All above circuits are operating in accordance with ICAO Communications Procedures.

NAVAL COMMUNICATIONS WITH COMMERCIAL AIRCRAFT IN CARIBBEAN AREA: Effective March 24, 1947, and until further notice, San Juan NAS, Trinidad NAS, Guantanamo NAS guard 6515 kcs voice continuously, transmitting and receiving, for communications with commercial aircraft.

LORAN RATE RELOCATED: "Frederick Dahl Loran Rate 1L4" shifted to new operations building June 23, 1947. This change involved new antennas, Transmitter, times, and transmission lines. A Loran System error may develop.

AFRICA-Casablanca, Africa: The following established circuits are now in operation at CNO Casablanca Aeronautical communication station: CSZ Lisbon, FXW Bordeau, FOO Paris, CNC Tangier, CNS Gaercife, CNA Fez, CNV Oujda, CNU Meknes, FOR Oran, FNA Algiers, CNN Taza, CNZ Fort Trinquet, CNY Tindouf, CND Agadir, CNX Marrekech FOK Dakar. Landline teletype to FFAG Algiers and CNPL Port Lyautey. Guards Route C radiotelegraph frequencies 3248, 6563, 8538, and 12776 kcs. Additional air ground guards 333, 336, 6510, 4195 kcs. Radio range and beacon identification "KR", 222 and 403 kcs. respectively. Tower voice VHF 116.1 mcs. and 6440 kcs.

Dakar, Africa: Effective May 15, 1947, Overseas Foreign Aeronautical Communications Station WFG, YOFF Airport, Dakar FWA, will be combined with FOK under call sign FOK. Following CAA circuits will be operated and supervised by French Nationals: A/G 3285, 6563 kcs. cont., 11319 kcs. daylight hours, point-to-point circuits, FOK/WFH Port Lyautey, FOK/ELPA Roberts Field, FOK/ZVJ Recife, FOK/ZNT Accra. Following principal circuits operation and supervision French Nationals: Point-to-point, FOK with following stations, CNB Casablanca, X 08 Natal, FOO Paris, FGS Abidjan, FNA Algiers, FSP Port Etienne, FMW Port Au France, FHK Amsterdam. Yoff Tower, range and beacon operation and supervision French Nationals, frequencies unchanged.

Dakar Weather Broadcast: Effective 0820Z GCT, March 24, 1947, station WFG commenced broadcasting Dakar METAR hourly at 20 minutes past each hour on 3285 kcs., A1 emission.

Port Lyautey Communications: Effective June 11, 1947, circuit operations NHY Port Lyautey to FOK Dakar and CSZ Lisbon were transferred to station CNO Casablanca. Following civil circuit functions remain in operation NHY Port Lyautey: Circuit 207T Port Lyautey-Santa Maria. Circuit 224 Port Lyautey-Roberts Field, Liberia. 24 hour landline teletype operations connecting NHY Port Lyautey and CNO Casablanca facilitates E and W traffic movements via 207T. Port Lyautey maintains continuous civil air ground guards 3285, 6563 kcs, 11319 kcs. from 0700 until 2200 GCT. Additional civil air ground guards 8554, 6543, 6523 kcs. upon request.

BELGIUM-Brussels: ONBU reports as from July 1st, 1947, the Queen Code ICAO document 2560 will be used by all the Belgian Stations.

BERMUDA-Somerset NAS Radio Facility: Somerset, Bermuda NAS transmissions, air ground CW 3285 and 6253 kcs., were discontinued April 3, 1947.

Belize, Honduras-Landing of Private Aircraft in Belize, Honduras: Aircraft intending to land at Belize Airport or on the Belize waterfront should give the Director of Aviation, Belize, Honduras, at least four hours' advance notice of their intended arrival. Flight plans may be filed for transmission to Belize between the hours of 1400Z and 2400Z through MIAMI CAA-operated overseas foreign aeronautical communications station.

Kingston, Jamaica-Montego Bay Airport: Montego Bay Airport is a British-controlled airport now under limited operation by Pan American Airways. It is necessary for all flights departing from Montego Bay for points in the U.S. to file flight plans with the Kingston ATC through the Kingston Communications Station - call letters MRX. Flight plans also must be filed for all flights departing from U.S. for Montego Bay. They may be filed for transmission to Montego Bay through the CAA-operated Overseas Foreign Aeronautical Communications Station at Miami - call letters WBR, or New Orleans - call letters WEK.

Kingston, Jamaica-Palisadoes Airport Facilities: The Palisadoes Airport is a British Government controlled airport. The Government controlled tower transmits on 397 kcs. only, and guards 2870, 3105, 6210 kcs. It is necessary for all itinerant flights coming to Palisadoes to file Flight Plans from point of departure to the Communications Station at Kingston - call letters MRX. This Flight Plan should be marked for Information: Palisadoes Airway Traffic Control. The route frequency of 6515 kcs. A3 emission is guarded at MRX. They have a good signal on this frequency and can be read consistently throughout the day and night in the Caribbean Area. Flight Plans may be filed for transmission to Palisadoes through the CAA-operated Overseas Foreign Aeronautical Communications Station, WBR, Miami.

Trinidad NAS: Effective June 16, 1947, Navy Squadron commenced conducting aerial gunnery from 1300Z to 2000Z daily except Sat. and Sun., until further notice. Surface craft and aircraft remain clear of area 1000N, 6045W, 1030N, 6045W, and 1000N, 6000W, 1030N, 6000W.

CANADA-Moncton, N.B.: Effective July 15, 1947, the following changes apply to air ground services offered by stations CYA Moncton: Moncton CYA will maintain standby watch only on frequencies 6563, 6577, 8538, 11319 kcs. from 1300 to 2000Z daily and on 3248, 3285, 6563, 6577 kcs. from 2000Z to 1300Z daily and will transmit on above frequencies only: (a) when called by aircraft; (b) on request OATC CFMO; (c) on request VOAC Voga.

Montreal, P.Q.-Dorval: Effective July 15, 1947, the following changes apply to air ground services offered by station CYB Dorval: Dorval CYB will maintain continuous watch and transmit on frequencies 3248, 6563, 8538, 12776 kcs only.

CUBA-Rancho Boyeros Airport, Havana, Cuba: Effective May 19, 1947, and until further notice, all aircraft operating into and out of the Rancho Boyeros Airport must file a flight plan prior to entering the area. This applies to both IFR and CFR flights. Form of flight plan as follows: Identification; type, route of flight, time of flight departure, time of minutes, altitude, CFR or IFR indicated by C or N respectively and alternate if necessary. Example: NC60459 DC3 Miami Havana 1230 92/60N KW. For trial period and until further advised all flight plans except Expreso and those presently using PAA communications facilities may be forwarded through WBR addressed to OAHAV at no charge.

GREECE-Hassani Airport, Athens, Radio Call: Effective April 30, 1947, call sign WWJC replaced Army call sign WUCW on all circuits formerly using call signs at this stn.

LABRADOR-Goose Bay: Effective July 15, 1947, the following changes apply to air ground services offered by station VOAV Goose Bay: Goose Bay VOAV will maintain continuous watch and transmit on frequencies 3248, 6563, 8538, 12776 kcs, but with frequencies 3285, 6577, 8554, 11319 kcs(receive and transmit)available on request.

MEXICO-Mexican Entry Fees: At Mexican Airports of Entry, charges include an overtime fee of 30 pesos after 12 noon for Immigration Inspection and a fee based on a full day's wage for each inspector involved for each 3 hours of overtime or fraction thereof after 2 P.M. for a Customs Inspection. Charges may also be made for a Customs guard to watch the plane and for the taxi fare to bring inspectors to the field after 12 noon. In American money total fees may approximate $15 to $20.

NEWFOUNDLAND-Military and Naval Landings: All military and naval aircraft

landing in Newfoundland should use Harmon Field at Stephenville or Naval Operating Base at Argentia. Gander has very limited military facilities and is reserved for commercial and weather diverted military aircraft.

Gander, Newfoundland: Gander Metar weather broadcast now in operation on 363 and 5410 kcs. simultaneously at hour plus 20 min. and hour plus 50 mins. Reception reports on 5410 kcs. requested.

Torbay Airport, Newfoundland: Torbay Airport open to traffic between the hours of 1030Z and 0230Z. No aircraft will be dispatches to arrive at Torbay between the hours of 0230Z and 1030Z. No traffic facilities will be available between the hours 1930Z and 1030Z. Landing and take off minimums as published in ATLD Amendment No. 16 will not apply. The landing and takeoff minimums will be as follows: Take off, day: 500'1 mi. visibility; take off, night: 500' 1 mi. visibility. Landing, day: 800' 1 mi. visibility; landing, night: 1000' 3 mi. visibility.

PACIFIC OCEAN-Weather Station Communications: Effective July 1, 1947, Pacific Ocean Weather Station FOX discontinued use of 4220 kcs for voice communications with trans-Pacific aircraft and substituted 5165 kcs for this purpose. The following paragraphs of SOP-1-A should be changed in accordance with the above: Section IV: 4 (a); 4 (b); 5 (a)(5); 5 (b); 5 (c) (1); 7 (a).

PUERTO RICO-San Juan Pre-Flight Clearances: San Juan Civil Air Terminal (U.S. Naval Air Station), Isla Grande Airport, San Juan, P.R. - All civil operations at San Juan Air Terminal were assumed by the Puerto Rico Transportation Authority effective March 4, 1947. Authority must be obrained for landings at this airport prior to the commencement of any flight. Address requests to Airports Division, Box 3508, San Juan, P.R. Cable address is "Autoritan".

San Juan-Seadrome Landing Lights: Effective June 9, 1947, the seadrome landing lights were discontinued and the landing light buoys were removed from the bay of San Juan at the Naval Air Station, San Juan.

San Juan NAS: Effective June 21, 1947 , repairs to runway were completed. Runway was restored to normal length of 5330'.

San Juan-Caguas: Radio antenna tower under construction unlighted until further notice, height 150', located 1-1/4 miles N of Caguas at latitude 18-15-20 N, longitude 66-1-53 W.

San Juan-Losey Field: May 1, 1947, Puerto Rico Transportation Authority took over the operation of Losey Field at Ponce. Operations at this field are restricted except in emergency to the southernmost 150' of the E/W runway - several bad holes on the northern half. NW/SE runway closed. Field available to daylight CFR operations only. (4-25).

DOMESTIC DATA

[redacted]: ALA-TENN-GA ARPT (BRIDGEPORT)-Ctn in wet weather. (5-22)
ALBERTVILLE ARPT-SW side of strip soft,rough & washing.Soft in spots in wet weather. (4-29)
ALLENPORT ARPT (MONTGOMERY)-Muddy after rains. Use with ctn. (5-22)
ATHENS ARPT-Ctn in wet weather. (5-22)
ANDALUSIA ARPT-Bare in spots. Ctn in wet weather. (5-22)
ANNISTON ARPT-Ends of strips soft in wet weather. (4-29)
ATMORE FLYING SERVICE-Soft in wet weather. (5-22)
ATMORE INT, SITE 16, NO-AG-Emerg. use only. (5-22)
BARIN NAAS EAST & WEST FLDS (FOLEY)-Closed to trans acft. (5-6)
BATES FLD (MOBILE)-RADIO: Twr equipped to transmit on and guard 121.9 mcs for mobile gnd traffic. (5-15)
BEAVER DAM FLD (DECATUR)-Soft after rainy weather. (5-22)
BIRMINGHAM ARPT-Closed to civil acft not equipped with operating rcvr. Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. Tetrahedron wind indicator lctd E end E/W rnwy to be discont. soon. (7-1)
BOYKIN FLD (DEMOPOLIS)-Cattle on fld. (5-22)
BREWTON ARPT, new-Cattle on fld. (5-22)

UNIVERSITY OF VIRGINIA ARPT (CHARLOTTESVILLE)-Ctn on E/W strip in wet weather. (3-17)

WINCHESTER ARPT-E end E/W strip rough. Contact Front Royal Radio or circle fld before landing. (3-7)

WOODRUM FLD (ROANOKE)-RADIO: Twr equipped to transmit on and guard 121.9 mcs for mobile gnd traffic. (5-10) FLD: Ext. local traffic days. Acft landing without establishing rdo commun with twr must conform to local traffic patterns. Observe twr at all times for lgt gun signals especially on base leg and final approach. Clear rnwy immediately after landing. Mil acft utilizing VHF freq should listen for control twr instructions or observe lgt signals from twr in response to their transmissions. All acft departing should determine proper rnwy and taxi route from twr or operations prior to taxiing. (2-28)

[redacted]: SPECIAL NOTICE-Benton County Danger Area approx 12 mi NW of Pasco is particularly hazardous-all flights avoid. (See Spokane Flight Planning Chart #3, Spokane Sectional, and Washington 5 Danger Area Charts)

ARLINGTON AERONAUTICAL SCHOOL ARPT-Unmrkd cable span being erected 11 mi E (78° true). Cable will run N/S between lat 48-13, long. 121-55, on Wheeler Mtn and lat 48-11-30, long. 121-55-00 on Blue Mountain. Cable anchorage levels at approx 2800' on both Mountains and will be approx 1000' above valley floor. Vertical-down-haul will be attached at mid-span terminating at the ground in Jim Creek Valley. Bcn inop. (4-25)

**ASOTIN CO. ARPT (CLARKSTON)-Flood, obst and portable strip lgts prior req. (4-16)

BARRY'S SKY HARBOR ARPT (TACOMA)-Right traffic, W take-offs and landings. (3-17)

BELLEVUE AIRFLD (SEATTLE)-Right traffic when landing to S. (3-19)

BELLINGHAM ARPT-Do not taxi off surfaced areas-sodded portions soft. Day traffic controlled by white T center of arpt. (6-20)

BOEING FLD (SEATTLE)-Daylgt CFR opers-lgt acft use mrkd dirt landing strip E side fld adj to main rnwy. Traffic patterns made to E at 1000'. Right traffic when taking off to NE. Flash. amber lgt on twr indicates flight pattern in relation to dirt landing strip. All turns, taxiing off or back on dirt area made toward twr. Acft using dirt strip avoid flying over main rnwy or approaches. Watch for air and ground traffic. Lgt gun signals for take-offs and final approaches only. Heavy acft use rnwys, taxi strips. Equip. on fld. All unscheduled acft landing at Boeing Fld must register with County Fld Office, except those who have made other arrangements with fld management. Equip. S of Admin Bldg loading ramp, avoid flagged area. Holes E side main taxiway, N and S of Admin Bldg. (4-4)

BUENA ARPT-Right traffic E take-offs and landings. (3-17)

CLE ELUM ARPT-Right traffic E takeoffs and landings. (3-17)

COUNTY-CITY ARPT (PORT TOWNSEND)-Right traffic E takeoffs and landings. (3-17)

COUPEVILLE OLF-Closed except in emerg.

EPHRATA ARPT-Wild horses on fld. (7-3). These data rcvd too late for Ⓞ symbol.

★EVERETT-RADIO: Overseas Foreign Aeronautical Communs Stn point to point radio-telegraph circuit 300X transmits on 168,4070,8130,11331,16232.5 kcs; 8110 kcs avail. on req. (6-23). Transmitting and rcvg 8280 kcs International Marine calling freq comm July 7, type A1 and A3 emission. (7-7)

FELTS FLD (SPOKANE)-Lgt non-rdo equipped acft use mrkd graded area S of main rnwy. Fancher Bcn near Felts Fld inop. Take-off and land on sod area before reaching taxiway near center of fld. N side rnwy mrkd. Equip. on fld. (4-22)

[redacted]: KELSO ARPT, SITE 61A, SF-SA-Equip. on fld. (6-9)
KENMORE ARPT (BOTHELL)-Avail. emerg use only-cattle. (9-10)
KITSAP CO. ARPT (BREMERTON)-Lgts inop. (5-12)
L & D SEAPLANE ANCHORAGE (PROSSER)-Ramp washed away. Possible to moor plane to existing boat float. Circle arpt lctd 1 mi N for gas truck or fone Prosser 91114. (5-20)
LONGVIEW SKYHARBOR SEAPLANE ANCHORAGE-Right traffic S take-offs and landings. (3-17)
MARTIN FLD (COLLEGE PLACE)-Const, equip. on strips. Strip 2500 x 150' S side of fld flagged for landing. Taxi strip adj. Center of fld rough and unsafe for landing. (4-29)
McCHORD FLD (TACOMA)-RADIO: AACS operated HF/DF stn temp suspended until further notice. (4-24) Army ILS (CAA type) temp inop. Middle mrkr to be relctd and present equip. will be modified. (3-13) FLD: Use rnwys, taxiways only. Equip. on fld. (12-11)
MT. VERNON OLF-Closed except in emerg. Training use rqrs 24 hrs advance notice thru Whidbey Island NAS Bcn inop. (3-20)
NELSON RIDGE, SITE 6, SA-HL-About Aug 1, bcn will be dismantled and relctd to lat 47-11-30, long. 121-01-42, 1-1/2 mi SE of present lctn. After relctn bcn will be recomm with no change in char. (5-13)
OLYMPIA ARPT-Rot. bcn flash. green and yellow used to warn local and trans acft of approach of scheduled transport acft. Bcn turned on five minutes before arvl and turned off upon arvl and landing of acft. (12-7)
PAINE FLD (EVERETT)-Lgts inop. (5-29)
PASCO-See Special Notice (first item under state heading)
PASCO NAS-Use in emerg only (caretaker status-no facs).
PIERSON ARPK (VANCOUVER)-Const. Use North E/W strip only. (3-17)
PULLMAN-MOSCOW REGIONAL ARPT (PULLMAN)-Avail. lgt acft only. (11-26)
PUYALLUP ARPT-Right traffic N take-offs and landings. (3-17)
S & S AIRSTRIP (PUYALLUP)-Right traffic S take-offs and landings. (3-17)
SAVAGE FLD (CHENEY) Moderate soil erosion intermittently. (9-14)
**SEATTLE NAS-RADIO: Navy MH fac in oper at lat 47-45-42, long. 122-17-08, pwr 200 watts. Cont oper. Class: MHW. Freq. 414 kcs. Ident. "X" (6-6). These data revd too late for inclusion on data page and chart. FLD: Single-engine acft approach from Kirkland 1500' descending to 1000' over the stn. Seaplanes approach over Lake Washington from N or S under 200'; landing area lgtd on req between sunset and sunrise. Rnwy 14-32 lgtd 30 minutes prior to arvls and dptrs between sunset and sunrise and on req. Tetrahedron lgtd sunset to sunrise. (5-27)
SEATTLE-TACOMA ARPT-RADIO: Outer mrkr of CAA ILS unmonitored. (6-5) FLD: Equip. on fld days. (5-22)
SPRAGUE ARPT-Entire fld rocky-dangerous. Emerg use only. (5-20)
SUNNYSIDE ARPT-Right traffic, S take-offs and landings. (3-17)
TONASKET ARPT-Right traffic S or SW take-offs and landings. (3-17)
WALLA WALLA AAF-RADIO: DF stn will be relctd at Spokane AAF in near future. FLD: No opers office. Equip. on fld days Mon thru Fri. (3-24)
WESTPORT ARPT-Driftwood on fld after extremely high tides. (1-2)
WHIDBEY ISLAND NAS-AULT FLD-Bcn operates during IFR and from sunset to sunrise. Warm-up aprons avail. for all rnwys. (4-3)
WILBUR ARPT-Taxiway const W side of strip. (4-25)
[redacted]: ELKINS ARPT-Ctc Elkins Rdo or circle fld before landing. (3-14)
**GREENBRIER ARPT (WHITE SULPHUR SPRINGS)-Formerly carried as Greenbrier AAF. (7-3). See page 64.
LOUIS BENNETT ARPT (WESTON)-Soft spots after continuous heavy rains. (4-10)
HUNTINGTON ARPT-305' twr Rdo Stn WHTN being erected 2.1 mi SSE. (7-4)
SCOTT FLD (BECKLEY)-Use right traffic on N course. (4-7)
WHEELING-RADIO: Ctn - VHF rng unmonitored. (4-9)
[redacted]: CAMP McCOY ARPT-Emerg use only-not maintained. (6-12)
CLINTONVILLE ARPT-Six sod strips avail. (4-22)
CHAPLIN'S ARPK (PLYMOUTH)-Only E/W strip avail. (5-23)
CURTISS-WRIGHT ARPT (MILWAUKEE)-Closed ngts. (4-22)
EAU CLAIRE MUN. ARPT-Ctn, equip. on rnwys and fld area. (4-23)
GEN. MITCHELL FLD (MILWAUKEE)-Equip. on fld days. Right turn procedure rstd to lcly [redacted] based acft. All acft land according to tetrahedron unless otherwise instructed by twr. All pilots must register in Admin Bldg upon arvl and dptr. Position lgts must be turned on and operating between sunset and sunrise for all flights to and from fld. Ditch extending 150' S of intersection NE/SW, NW/SE rnwys paralleling SE portion NW/SE rnwy for 1/2 mi. Obst lgt atop 95' chimney SW corner fld inop. Rdo rcvr req for all lcly based acft. E/W rnwy closed, avail. taxiing only. (5-13)
GINNOW ARPT (OMRO)-Use strips only. (4-1)
LA CROSSE ARPT-Use rnwys only. (5-23)
MERRILL ARPT-Use rnwys only-soft after heavy rains. (6-3)
MOREY ARPT (MADISON)-Use strips only. (5-19)
OCONTO FALLS ARPT-Use strips only. (3-26)
RICHLAND FLYING CLUB INC (SEXTONVILLE)-Equip. on fld. (5-5)
SHAWANO ARPT-Soft when wet-use rnwys only. (6-3)
SKY HAVEN ARPT (MILWAUKEE)-Use ctn on S 1/3 portion N/S strip. Stay on strip. (4-7)
STEVENS POINT ARPT-Use rnwys only. (5-23)
THREE LAKES ARPT-Const. (6-13)
TOMAH ARPT-N/S strip under const. (5-19)
TRUAX FLD (MADISON)-Use rnwys only. Grass area 75' wide adj to rnwys rough, bal of grass areas unsafe and rough. Flood lgts and svcg not avail. 2230 until 0700 daily with the exception of Thurs when flood lgts and svcg not avail. after sunset. (4-8)
WAUPUN ARPT, new-New arpt under const 2 mi WSW Waupun. Closed to trans acft. (3-15)
WINNEBAGO CO. ARPT (OSHKOSH)-Use rnwys only. All traffic left hand, 600' except E and NE which is right traffic 600'. (4-7)
[redacted]: ARCHER-RADIO: FM on E course of Cheyenne rng will be decomm soon.
★CASPER AAF-RADIO: Army AACS air/gnd stn in oper. (7-1)
CHEYENNE-RADIO: Soon, the Hillsdale VHF bone-shaped FM will be comm at lat 41-09-30, long. 104-31-30, 16.2 mi E of Cheyenne low freq range. Ident. one dash.
CHEYENNE ARPT-RADIO: CAA ILS will be comm soon. Voice equipped lclzr on 110.3 mcs. Ident. "CX". Lctd 457' W of the W end of the E/W rnwy. Mag heading for landing: 262°. Glide path on 335 mcs, lctd 982' W of approach end and 400' S of centerline of E/W rnwy. Middle mrkr lctd 3461' E from approach end E/W rnwy, keyed alt dots and dashes. Outer mrkr 32,274' E from approach end of E/W rnwy, keyed 2 dashes. Middle compass lctr on 230 kcs, ident. "X". Outer compass lctr on 260 kcs, ident. "C". (5-23) FLD: Equip. on fld days. Lgtd bldg between E/W rnwy and taxi strip, 1000' from E end. (7-7)
JACKSON MUN. ARPT-Cattle on fld intermittently. (6-13)
RAWLINS ARPT-Equip. on rnwys. (4-17)
ROCK SPRINGS MUN. ARPT-Use rnwys, taxiways only, bal fld unsafe-const. Equip. on fld. Glide path bldg 400' S and 750' from E end E/W rnwy. (7-8)
SHERIDAN CO. ARPT-N/S rnwy unsafe heavy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. Ctc Sheridan Rdo for fld lgts. (2-6)
WARDWELL FLD (CASPER)-Use rnwys, taxi strips only, bal fld rough. 40' unlgtd pole erected at 30 million candle pwr ceilometer projector 1000' N of hangar. (4-8)
WORLAND-ARPT-Strips under const. Equip. on strips days. Use with ctn. (5-21)

[redacted]
**FORT DIX-Danger area has been established for intensive firing of all types infantry weapons including heavy artillery in the following area: Effective between July 1 and Sept 15, beginning at lat 40-02-45, long. 74-25-50; thence to lat 39-56-45, long. 74-24-00; thence along RR to lat 39-56-00, long. 74-26-00; thence to lat 39-57-20, long. 74-27-40; thence along Road to lat 39-57-20, long. 74-33-30; thence N to lat 40-02-45, E to point of beginning.

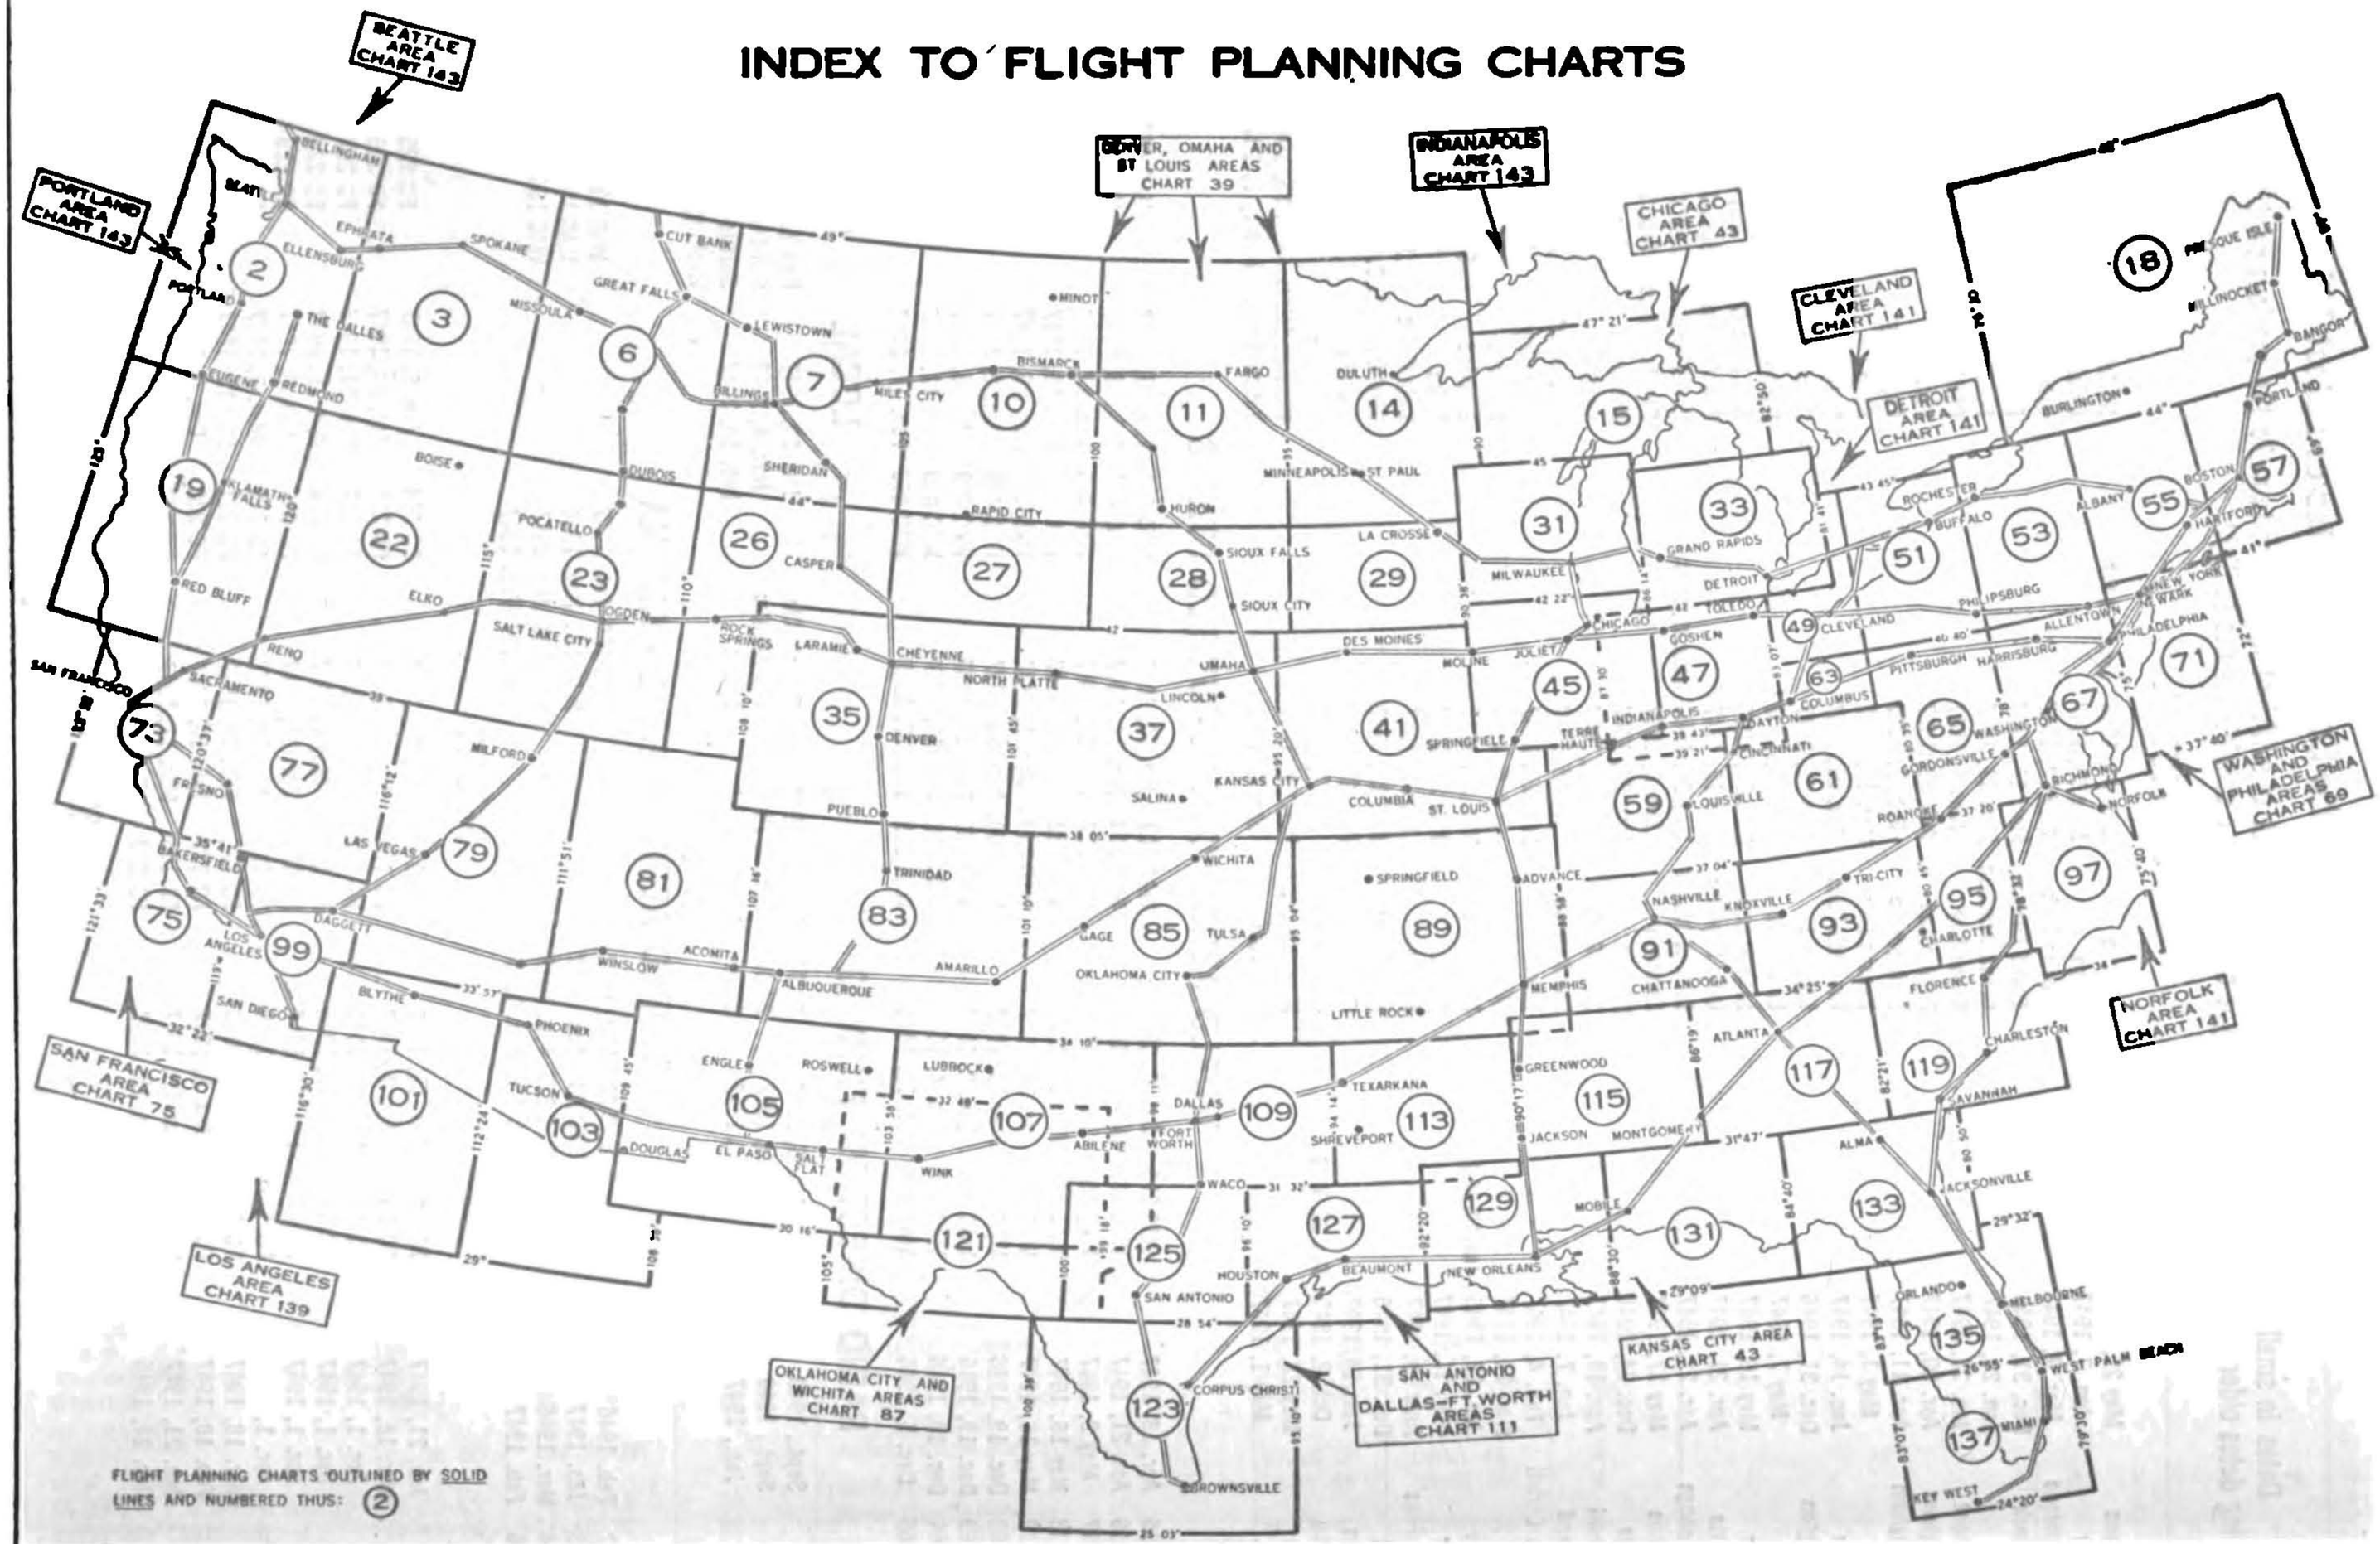
INDEX TO FLIGHT PLANNING CHARTS



SPECIAL NOTICE

Because of appropriation cuts, the charts and data pages of the Airman's Guide are to be eliminated. The Guide of August 5, 1947, will be the last one to contain this material. Adjustments for subscribers will be made by the Government Printing Office on a basis to be announced in the issue of August 5th.

Thereafter, the C.A.A. will issue a bi-weekly Notice to Airmen (without charts and data pages, which will retain the name Airman's Guide). It will also issue a semi-annual Directory of Airports.

Radio Facility Charts (depicting all aeronautical radio facilities but no airports except those radio range-associated and/or tower-controlled) will be available from the Coast and Geodetic Survey, Department of Commerce, on a loose-leaf, for-sale basis.

A prospectus covering the Coast and Geodetic Survey charts may be found on page 177.

NOTICES TO AIRMEN 150

GUIDE CONTENTS

THE AIRMAN'S GUIDE IS A COMPOSITE DIRECTORY OF AIRPORTS, AIR NAVIGATION RADIO AIDS, AND NOTICES TO AIRMEN. ON THE DATA PAGES ARE TABULATED ALL THE DATA COVERING THE FACILITIES CHARTED ON THE BACKING PAGES. THIS PRESENTATION IS GRADUALLY BEING REVISED, HOWEVER, SO THAT EVENTUALLY THE DATA PAGES WILL FACE THE CHARTS.

INDEX OF FACILITIES

TO FIND THE NUMBER OF THE PAGE ON WHICH A FACILITY IS CHARTED, REFER TO THE INDEX OF FACILITIES BELOW. AS OUTLINED ABOVE, THE DETAILED DATA FOR THE FACILITY WILL BE FOUND ON THE DATA PAGE BACKING, OR FACING, THE CHART.

NEW DATA PRESENTATION

(A) ON THE DATA PAGES BACKING OR FACING THE CHARTS, NEW DATA OR REVISIONS ARE INDICATED BY ARROWS; (B) IN THE NOTICES TO AIRMEN SECTION, CITATIONS COVERING NEW OR REVISED RADIO DATA ARE PREFIXED BY ONE LARGE STAR " ★ " CITATIONS COVERING NEW OR REVISED AIRPORT, OR MISCELLANEOUS DATA ARE PREFIXED BY TWO ASTERISKS "**"

DATA PAGE NOTAMS

BECAUSE OF THE SERIOUS PAPER SHORTAGE, THE DATA PAGES, WHERE POSSIBLE, HAVE TO SERVE AS NOTAM (NOTICES TO AIRMEN) PAGES. RESULTANTLY, MOST OF THE NEW DATA FORMERLY NOTAMIZED IN THE NOTICES TO AIRMEN SECTION WITH PREFIXED LARGE STARS OR DOUBLE ASTERISKS ARE NO LONGER CARRIED IN THAT SECTION. ONLY COMMISSIONINGS, ABANDONMENTS, OR CHANGES SO POTENTIALLY HAZARDOUS THAT THEY ARE INDICATED WITH Ⓡ (FOR RED FLAG) SYMBOLS ON THE CHARTS, ARE NOW CITED IN THE NOTICES TO AIRMEN SECTION. NOTAMIZING ON THE DATA PAGES IS EFFECTED BY THE USE OF PREFIXED ARROWS AS IN THE FORMER AIR NAVIGATION RADIO AIDS PUBLICATION. ANY CHANGES FROM THE PREVIOUS ISSUE, WHETHER CITED IN THE NOTICES TO AIRMEN SECTION, OR NOT, ARE INDICATED BY THE PREFIXED ARROWS. FOLLOWING ARE EXAMPLES OF CHANGES NOTAMIZED ONLY ON THE DATA PAGES: FIELD OBSTRUCTION, SERVICING, ELEVATION, LOCATION, AND RUNWAY LENGTH CHANGES. BECAUSE OF THE USE OF THE PREFIXED ARROWS AS NEW DATA INDICATORS, A FURTHER INNOVATION HAD TO BE ADOPTED. THIS IS A TINTED HORIZONTAL LINE FOLLOWING THE LAST TABULATED FACILITY AND TITLED EITHER NEW RADIO FACILITIES OR NEW AIRPORTS.

HOW TO USE THE AIRMAN'S GUIDE

NEW FACILITIES ON DATA PAGES

SPACE BELOW THE TINTED HORIZONTAL LINES ON THE DATA PAGES HAS BEEN RESERVED AS A SUPPLEMENT FOR NEW RADIO AIDS AND AIRPORTS WHOSE DATA WERE RECEIVED AFTER THE DATA PAGES WERE ORIGINALLY TYPED. REVISIONS TO EXISTING AIRPORTS AND RADIO AIDS ARE SUPER-IMPOSED ON THE OLD DATA. NEW AIRPORTS AND RADIO AIDS HOWEVER, ARE LISTED, NECESSARILY OUT OF ALPHABETICAL ALIGNMENT, BELOW THE TINTED HORIZONTAL LINES UNTIL THE PAGE IS RE-TYPED.

CHART NOTAMS

NOTAMIZING ON THE CHARTS IS EFFECTED BY USE OF THE SUPERIMPOSED Ⓡ AND Ⓟ SYMBOLS. THE Ⓟ (FOR RED FLAG) INDICATES A VERY HAZARDOUS CONDITION OR A MAJOR CHANGE. THE Ⓞ SYMBOL (FOR ORANGE FLAG) INDICATES A MINOR CHANGE OR HAZARDOUS CONDITION WITH THE FACILITY STILL USABLE WITH CAUTION. THE PERTINENT DETAILS TO WHICH THESE SYMBOLS REFER WILL BE FOUND LISTED IN THE NOTICES TO AIRMEN SECTION UNDER THE FACILITY NAME (AND STATE) BY WHICH THEY ARE CHARTED.

Ⓡ and Ⓞ SYMBOLS

THESE SYMBOLS WERE ADOPTED FOR SUPER-IMPOSITION OVER CHARTED FACILITIES TO INDICATE HAZARDOUS CONDITIONS AND COVERING NOTICES TO AIRMEN. THUS, IF A CHART USER NOTES NO SYMBOL ON THE FACILITIES HE IS PLANNING ON USING, THERE IS NO NECESSITY FOR HIM TO WADE THROUGH THE 30-ODD PAGE NOTICES TO AIRMEN SECTION

NOTICES TO AIRMEN SECTION

ALL TEMPORARY CONDITIONS (FIELD SOFT, RUNWAY UNDER CONSTRUCTION, RANGE COURSE OUT OF ALIGNMENT, ETC) ARE CITED IN FULL IN THE NOTICES TO AIRMEN SECTION UNTIL THEY ARE NO LONGER IN EFFECT. WHEN A CITATION CARRIES A PERMANENT ITEM AND A TEMPORARY ITEM, THE PERMANENT ITEM IS UNDERLINED. PARENTHETICAL DATE AT END OF ITEM INDICATES TIME ITEM WAS REPORTED. TO CONFORM TO CHART PRACTICE, ALL FACILITY DATA ARE LISTED IN THE NOTICES TO AIRMEN SECTION AND ON DATA PAGES ALPHABETICALLY BY STATES AND BY FACILITY NAME. THUS, AN AIRPORT WILL BE FOUND LISTED ALPHABETICALLY UNDER ITS OWN NAME RATHER THAN UNDER ITS LOCALE'S NAME. IF THE AIRPORT OR RADIO FACILITY NAME IS OTHER THAN THAT OF THE CITY IN WHICH IT IS LOCATED, THE LOCATION IS SHOWN IN PARENTHESIS AFTER THE FACILITY NAME.

SPECIAL NOTICES

NOTICES OF NATIONAL INTEREST, OF GREAT IMPORTANCE, OR OF NON-LOCALIZED NATURE, WILL BE FOUND AT THE BEGINNING OF THE NOTICES TO AIRMEN SECTION.

CIVIL FACILITY CHANGES: ADVISE WHOM

PLEASE ADVISE THE OFFICE OF AVIATION INFORMATION, ATTENTION A-250, C.A.A., DEPARTMENT OF COMMERCE, WASHINGTON 25, D.C. AS SOON AS TEMPORARY CONDITIONS COVERING CIVIL AIRPORTS OR NAVIGATIONAL AIDS BEGIN OR TERMINATE, OR FLIGHT HAZARDS ARE ERECTED OR REMOVED. FIELD DATA REVISIONS SHOULD BE SUBMITTED TO THE NEAREST C.A.A. DISTRICT AIRPORT ENGINEER.

TO ALL SUBMITTERS OF AIRMAN'S GUIDE DATA

AN UNDER-MANNED STAFF PREVENTS AN INDIVIDUAL ACKNOWLEDGMENT OF DATA SUBMITTED FOR THE AIRMAN'S GUIDE BY TELEGRAM, TELETYPE DISPATCH, OR LETTER. YOUR COOPERATION IN PERMITTING A GUIDE CITATION TO SUFFICE AS AN ACKNOWLEDGMENT WILL BE APPRECIATED.

INDEX OF FACILITIES

LEGEND

A - AIRPORT WITH AN ASSOCIATED RADIO FACILITY IDENTICALLY NAMED
FM - FAN MARKER
H - NON-DIRECTIONAL RADIO BEACON
R - RADIO RANGE
T - AIRPORT WITH CONTROL TOWER

N.B. ALL FACILITIES WITHOUT A LETTER SUFFIX ARE AIRPORTS. NAMES NOT FOLLOWED BY A NUMBER SUFFIX ARE NOT AIRPORTS BUT MERELY GEOGRAPHICAL LOCATIONS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY: All GCA facilities (Army, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance pilots should call the associated control tower for instructions.

In addition to the working frequencies listed below, Army and Navy GCA emergency VHF transmissions are made on 140.58 mcs. Simplex service on 3117.5 kcs will be provided at all Army and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army and Navy towers will relay GCA instructions on 200-400 kcs band to civil aricraft not equipped to receive VHF or HF.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service.

NAVY GROUND CONTROLLED APPROACH (GCA): Universal frequencies allocated primarily for Navy GCA operational use ,transmitting and receiving, are as follows:

HF Communications 3475,4890,6640 kcs. **VHF Communications** 134.64,142.02,143.64 mcs.

Navy GCA Units shall be prepared to control aircraft on the interim U.S. emergency frequency, 140.58 mcs, transmit and receive. Use of this frequency should be restricted to emergencies and routine check of communication equipment.

In addition to above, Navy GCA Units will be prepared to transmit on HF from 2000 to 18100 kcs. and receive on 1500 to 9050 kcs to aid any plane in emergency.

To promote flight safety, the Navy Department has made its GCA facilities available to civil aircraft for emergency use. Practice approaches by civil aircraft is restricted to multi-engine aircraft because of personnel and equipment limitations. Navy GCA Units shall be prepared to control scheduled aircarriers in emergencies on 140.58 mcs and 3117.5 kcs, transmit and receive. In addition arrangements shall be made to transmit GCA control instructions on tower low frequency either directly or by relay through the tower to aircraft in distress and not able to receive on any other frequency.

Call signs for all Navy GCA Units are the name of the field plus "GCA". Example: "Norfolk GCA".

ARMY GROUND CONTROLLED APPROACH (GCA): (a) CONTACT: Pilots requiring GCA assistance should call the associated control tower requesting instructions for working GCA. Example: "Andrews Tower, this is Army 5555, request GCA". (b) TOWER **INSTRUCTIONS: Control towers will ascertain frequencies available to both** pilot and **GCA, advise the pilot and establish contact with the GCA unit. Example: "Army 5555, this is Andrews Tower, do you have channel G, over". "Andrews Tower, this is Army 5555, channel G available, over". "Army 5555, this is Andrews Tower, establish contact with GCA on channel G, out". "Andrews GCA, this is Army 5555, over". "Army 5555, this is Andrews GCA, your position is now etc.....". (c) EMERGENCY. When receiver and transmitter difficulties exist, the tower may relay Ground Controlled** Approach **instructions to the pilot. However, from a safety standpoint the procedure** should **be used as an emergency contingent only. (d) ALERTING GCA: After being inoperative, GCA units require approximately 20 to 30 minutes for warming up. Pilots should anticipate requirement for GCA in flight planning and request alerting of GCA units as far in advance as possible.**

C.A.A. GROUND CONTROLLED APPROACH (GCA): The C.A.A. has control tower operated GCA units at Washington National Airport, Chicago Airport and La Guardia Field. Another unit is operated at Indianapolis Airport but is not remoted to the tower. These units are available for practice purposes and emergency use.

→ - New or revised data*

RADIO CLASS DESIGNATIONS

AC.....Approach Control Tower, CAA
B.....Scheduled Broadcast Station (broadcasts weather reports at 15 and 45 minutes after the hour unless otherwise cited)
C.....Control Tower, CAA
CA.....Control Tower, Army
CL.....Control Tower (City, County, Private, etc.)
CN.....Control Tower, Navy
D.....Distantly controlled
FM.....VHF fan type marker (100 watts)
FMHW.....Non-directional radio beacon when combined with fan marker.
GCA.....Ground control approach system
H.....Non-directional radio-beacon (homing), power 50 watts or more
ILS.....Instrument Landing System (voice on localizer channel)
IM.....VHF boundary marker
LFM.....VHF fan type marker, low powered (5 watts not over 10 miles from range)
LOR.....Low frequency omni-directional range
MH.....Non-directional radio-beacon (homing), power less than 50 watts
ML.....Range (loop radiators), power less than 50 watts
MM.....VHF middle marker
MMK.....Compass locator station when combined with middle marker of Instrument Landing System
MRA.....Range (adcock, vertical radiators), power more than 50 less than 150 watts
MRL.....Range (loop radiators), power more than 50 less than 150 watts
OM.....VHF outer marker
OMK.....Compass locator when installed at outer marker site or within
P.....Point to point radio } 5.5 miles of middle marker
RA.....Range (adcock, vertical radiators), power 150 watts or more
RL.....Range (loop radiators), power 150 watts or more
S.....Simultaneous (range signals and voice) type of transmitter
T.....Teletype
TX.....Principal teletype
V.....Additional voice feature on VHF
VAR.....Visual-aural VHF range (every VAR has simultaneous
VOR.....VHF omni-directional range } voice feature)
W.....Without voice facilities
Z.....VHF station location marker at a range station

N.B. Variation is computed at the station. The distance from station to field is computed from the center of the range station to the nearest edge of the usable area of the airport. The bearing is that from the range station to airport or fan marker.

AIRWAY RADIO COMMUNICATIONS

GENERAL

All radio range stations (class RA, RL, MRA, MRL, ML) emit directional signals (type A2 emission) 1020 cycles per second modulation.

All radiobeacon stations (class H and MH) emit non-directional signals (type A2 emission) 1020 cycles per second modulation. Unless otherwise noted, all stations, other than class MH, operate continuously within their assigned hours of service except during interruptions for voice transmission on the same frequencies where simultaneous transmission is not available and during shutdowns for maintenance purposes. Class MH stations operate on request unless otherwise cited. The effective range of an MH facility is ordinarily 25 miles.

Compass locators are low-powered non-directional facilities operating in the 200-415 kc. band. They are installed near airports to make it easier for pilots to make instrument approaches When holding is required, they also help the pilot follow a more precise holding pattern. Compass locators, however, should not be depended upon as long range navigational aids since they are rarely useful at distances of over 15 or 20 miles. These are now shown as "MHW" facilities.

Voice communications facilities are available unless "W" (without voice) is included in the classification. Examples: SMRAW, MRLW, HW, HWT. Transmission of voice on a frequency other than the range frequency is indicated as MRLW-V. When no "W" is included in station class, the "V" indicates voice feature on two frequencies, namely, range frequency, and generally, VHF of 116.1 and/or 111.1 mcs. 116.1 mcs. is used for transmission to Army aircraft, 111.1 mcs. to civil aircraft.

The classification designation "B" denotes that the station broadcasts meteorological and notice to airmen information on a scheduled basis at 15 & 45 minutes past each hour unless otherwise cited.

All Civil Aeronautics Administration stations equipped for voice communications with aircraft stand continuous listening watches on the frequencies of 3105, 4495, and 6210 kcs., unless otherwise cited.

* AT THE BOTTOM OF THE LAST COLUMN, UNDER THE HEADING OF NEW RADIO FACILITIES, BORDERED BY TINTED LINE WILL BE FOUND, OUT OF ALPHABETICAL ALIGNMENT, ALL THE NEW RADIO FACILITIES TABULATED AFTER THE TYPE FOR THAT PAGE HAD BEEN ORIGINALLY SET UP.

N.B. For Digest of A.T.C. and Communications Procedures, see *FLIGHT INFORMATION MANUAL*

AIRPORT DATA
LEGEND

(Where city and airport names are identical, the airport name is omitted in the interest of space conservation)

(A)	Airport name	(A)	- Owned or leased totally by Army	
(N)	"	(N)	- "	Navy
(CG)	"	(CG)	- "	Coast Guard
(NG)	"	(NG)	- "	National Guard
(A)	"	-	Open to civilians but owned or leased wholly or in part by Army, Air Reserve, Army svcg. detach. or contract gas usually available.	
(N)	"	-	Open to civilians but owned or leased wholly or in part by Navy.	
(CG)	"	-	" Coast Guard.	
(NG)	"	-.	" WD or State Govt, for Air Nat'l Guard. Lid svcg. and maint. for transient military acft.	
(P)	"	-	Civil airport opened to military acft. (See Note 3)	
☆	"	-	CAA Intermediate Field	

CLASS
SIZE

40: Length of longest landing strip (unpaved) in hundreds of feet
40h: Length of longest hard-surfaced runway in hundreds of feet (Seaplane landing areas over 5 miles in length are classified as unlimited and indicated as "unl")

N.B. Only the length of the longest runway is cited, and its direction is not indicated. Space restrictions occasioned this policy, but logic justified it. The logical assumption may be made that runways have been laid out in accordance with the local wind rose. Therefore, in all calms, or gentle-angling winds, or winds aligned with the longest runway, the longest runway will be used. When a wind not aligned with the longest runway is of such intensity that the longest runway cannot be used, this wind makes the use of runway aligned with the wind, even though much shorter than the longest runway, sufficiently long from a safety viewpoint. Too, prior knowledge that there is, for example, a NW/SE runway is of little value to a pilot if, when he arrives over the field the wind is blowing too strongly from another direction to use that runway. Finally, the larger the number indicating the longest runway length, the greater is the assurance of a sufficient number of runways for all-wind coverage.

RADIO

R1: Voice availability via tower, range (or homing device), or voice station
R2: Range (or homing device) and tower
R3: Range (or homing device), tower, and instrument landing system

LIGHTS

L: Incomplete lighting, either flood or portable runway lights
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway contact
(L5): Identical to L5 except that runway contact lights are high intensity
L6: Beacon, boundary, obstruction, flood, runway contact, and instrument approach
(L6): Identical to L6 except that instrument approach lights are high intensity

(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

N.B. Very often small civilian fields (particularly in non-metropolitan areas) will have no full-time attendant. Frequently, servicing at such fields in isolated communities is available only by circling the town to attract the operator's attention.
These fields are often recognizable by airport class, comparable to, for example, "1S S1" "1S S1" suggests that the field is not too large, and that the field may not have a full-time attendant even though fuel is stored there. Lack of radio or lighting facilities, indicated by the absence of an "R" or "L" in the airport class, is a further indication that a full-time attendant may not be available. Absence of an "S" (servicing) indicates definitely that fuel, if available at all, is available only by truck from town. Any field carrying no indication of radio (R), lights (L), or servicing (S) in airport class columns should be used with caution, especially a field of the small category. Fields of this nature may be inactive or not maintained, and thus dangerous for use.

NOTES

1. "(NC)" not charted. Indicates not charted because of insufficient data or inability to verify
2. → New or revised data. ☆
3. "(P)" in CITY-AIRPORT NAME column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the War Department.
4. "Effingham Int., 10, L5-ED" in CITY-AIRPORT NAME column indicates that the airport is Effingham CAA Intermediate Field, Site 10, on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the CAA are listed similarly except that there is no prefixed star or "Int.".
5. In Location column, the word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.
6. In Remarks column:
   (a) "91 oct.", indicates fuel octanes available. "Army", or "Navy" following octane indicates Army or Navy contract fuel available.
   (b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business this station or in emergency.
   (c) "Port. B-2 lights" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway.
   (d) "TEMP INACTIVE. NO FACS." indicates AAF airfields used either exclusively by the AAF or municipal airfields used jointly by the AAF and civil interests at which both the Army and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned (See Special Notice).
   (e) "ARMY TEMP INACTIVE. CIVIL FACS." indicates municipal airfields used jointly by the AAF and civil interests at which the Army facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.
   (f) "PRIVATE" indicates field is available for owner only, and not to be used by others except in emergency. Only those private fields that are clearly identifiable from the air as airports are listed. Thus many personal use fields are not covered in the Guide because they are not marked or are too small.
   (g) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
   (h) "Fld lgts on prior req." indicates field lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the field lights, indicated for such a lighted field (and, in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the field lights burn all night or will be turned on when a radio request is made or a plane circles the field.
   (i) "FEE" indicates landing fee for private aircraft.
7. Airline stop airport names are capitalized or bracketed.

COLUMNAR EXPLANATION

FLIGHT PLANNING CHARTS

LEGEND

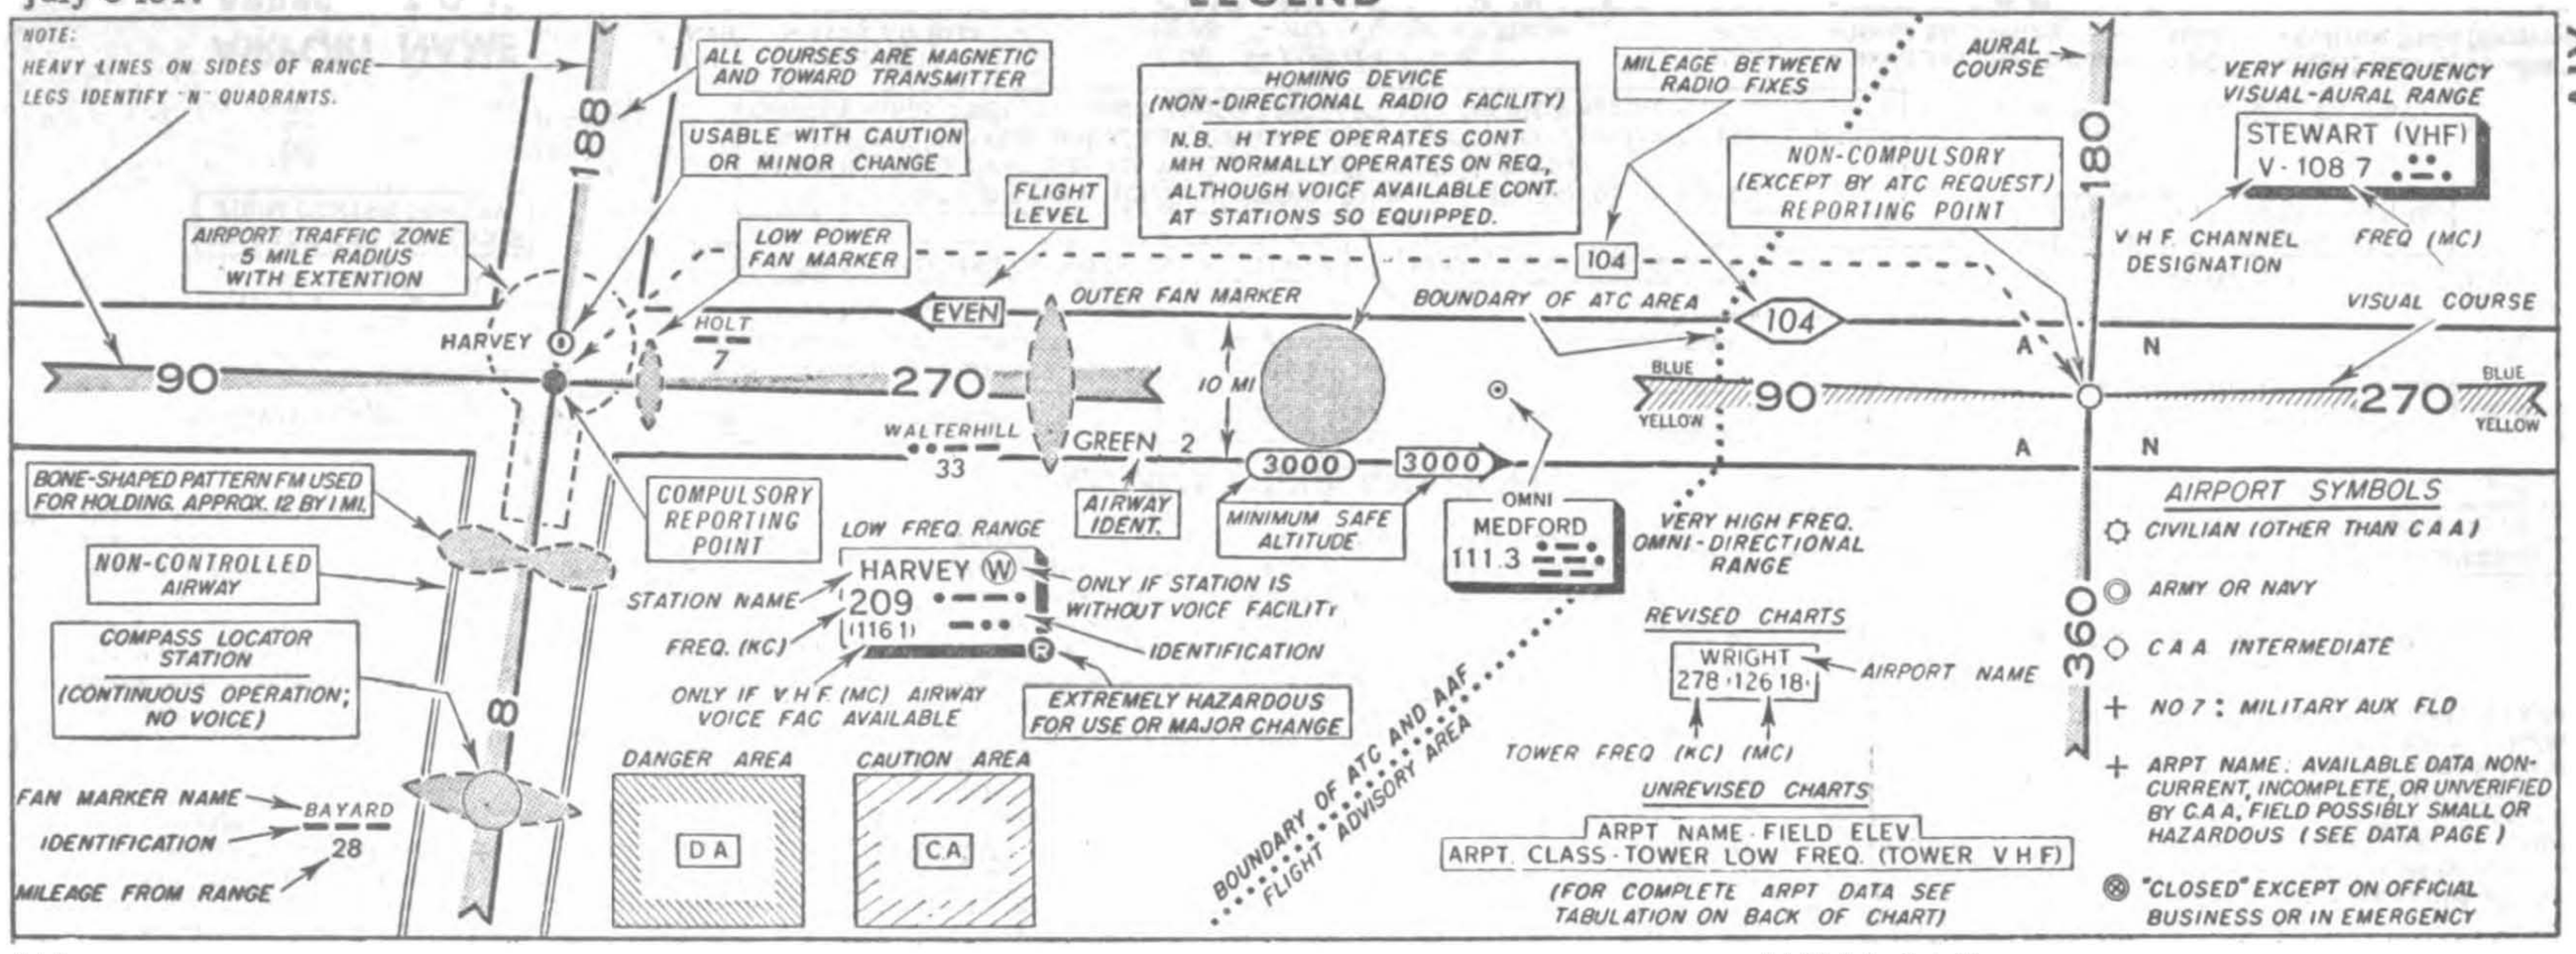

CHART CONTENTS

The Flight Planning Charts, in addition to the warning (R) and caution (O) symbols, indicate: (1) all aeronautical radio facilities except air carrier stations; (2) all minimum safe altitudes and fix mileages; (3) all Army and Navy fields and CAA intermediate fields, and all active civilian airports; (4) all danger and caution areas; (5) all designated airways These charts indicate all facilities, and the current status thereof, on record with the CAA as of 0001 E.S.T. each alternate Tuesday.

CHART PURPOSE AND USE

The primary purpose of these charts is to facilitate the planning and execution of cross-country flights. The user should check the charts for the symboled (R) or (O) items between his point of departure and his destination. If there is none, there is no necessity for him to read the Notices to Airmen section as far as temporary items are concerned. As for permanent changes - all major ones, such as new fields, abandoned fields, range freqnency changes, etc., are currently reflected on the charts. For record-keeping purposes and for the correction of charts and publications, however, the Notices to Airmen section should be carefully read.

VHF CHANNEL LETTER DESIGNATORS

Channel letter designators are being shown on the Flight Planning Charts herein only as an aid to pilots in their use of unmodified military equipment. It is emphasized that not all very-high frequencies now in use have channel letter designators. Standardization of air-borne equipment in this respect has not been effected, nor is it expected to be along the lines of one-letter designators because of the large number of frequencies which eventually will be in use.

CHART HAZARD SYMBOLS

The current status of facilities and hazards as reported to the CAA is indicated by the symbol system. An airport closed because of construction, an inoperative range, a revised range quadrant identification or range frequency, or course realignment of 20° or more, for example, are indicated by the symbol (R) for red, or warning. An airport under construction but usable, or an inoperative control tower, on the other hand, is indicated by the symbol (O) for orange, or caution.

RANGE COURSE LENGTHS

In general, the length of radio range courses shown herein indicates the approximate location where it is expected that a pilot will tune from one radio range to the next one along his route of flight. Such change-over points, however, are not mandatory, and it is expected that a pilot will use his best judgment in selecting change-over points that will best serve his needs.

WARNING

Radio range courses are subject to disturbances that result in multiple courses, and signal fades and surges over rough country Pilots flying over unfamiliar routes are cautioned to be on the alert to detect these vagaries, particularly over mountainous terrain.

Loop ranges (such as ML, RL, MRL without simultaneous feature) are not suitable for DF and ADF operations. DF or ADF use should be restricted to simultaneous type of range stations, H stations, and commercial broadcast stations.

N.B. The attempt to superimpose VHF ranges cartographically upon the low frequency system practically nullified the Guide charts for either VHF or LF navigation.

It was decided, therefore, to give the VHF ranges separate coverage. With the Guide's stringent page limitations, separate VHF range charts necessitated the elimination of the Civil Airways and Mileage Charts. Specific flight advisory and traffic control area boundaries and specific fix mileages, however, may still be found on the indifical Guide Charts.

It is hoped that the mileages tabulated above facilitate flight planning because the addition of small sector mileages is no longer necessary.

NOTICES TO AIRMEN

SPECIAL NOTICES

ARMY DATA: Advice covering Army fields or Army operations on civil fields, or Army radio facilities, and also Air National Guard fields and facilities should be forwarded to Commanding General, Air Transport Command, ATTN: Flight Operations Division, A-3. Requests for approval of the closing of Army airfields or restrictions in airfield facilities to transient military aircraft for over 10 days should be forwarded to the same address for submittal to Headquarters Army Air Forces, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/gnd communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25,D.C. for transmittal to the Civil Aeronautics Administration. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of 10 days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, or permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction; or merely a burned-out obstruction light or a runway partially unusable because of construction. Obviously, temporary hazardous conditions should be reported to the aeronautical public at once The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent In other words, a temporarily closed airport is ordinarily of much more importance from a safety angle than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood, or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide.

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

USE OF AIRPORTS BY MILITARY AIRCRAFT: (1) AAF REGULATION 85-2: The attention of Army clearance personnel and of Army pilots is invited to the provisions of Section III, AAF Regulation 85-2 and AAF Regulation 85-2A, which state in part: "Except for those Army aircraft assigned to civil contractors or agencies under bailment contract, no Army aircraft will utilize civil airports which have not been leased, purchased, or where AP-4 or similar landing rights agreements have not been negotiated by the Government, except in case of emergency or in case of official business. Each instance of flights in AAF aircraft for official business will be covered by competent air force, major air command, or higher authority orders. Each instance of flights for official business in organic aircraft of the Army Ground Forces will be covered by written orders of the commander of the unit to which the aircraft is assigned. These written orders must designate the field of intended landing. Unauthorized use of such airports is a substantiating factor in claims for damage with accompanying requests to the Government to bear maintenance and repair costs or to provide Government equipment at such civil airports. Notation will be made by clearing authorities in Remarks section of AAF Form 23 that competent authority authorizes use of such fields and will be transmitted in Remarks Section of the flight plan as 'authorized flight'. All landings by military aircraft without competent written orders on inactive, temporarily inactive Army airfields and civilian airports, except in case of emergency, will be limited to the ones identified by letters "A, N, NG, or P" in the Airman's Guide. It is the responsibility of the various air forces, major air commands and certain field activities under the direct control of the Commanding General, AAF, to prevent unauthorized use of airfields and airports as outlined in this Regulation".

2. "OFFICIAL BUSINESS" within the meaning of AAF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the puspose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant with itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation

3. POLICY OF ARMY USE OF TEMPORARILY INACTIVE AIRFIELDS: (a) Municipal airfields which have been used jointly by the Army Air Forces and civil interests and at which Army facilities are temporarily inactive but the civil facilities are still active, may continue to be used by military aircraft. No servicing other than that provided by commercial concerns will be available. Such airfields will be identified herein (directory section only) by the following notice: "ARMY TEMP INACTIVE - CIVIL FACS"
(b) Temporarily inactive Army airfields used exclusively by the Army Air Forces (either owned or leased) or municipal airfields used jointly by the Army Air Forces with civil interests at which both Army and civil facilities are inactive will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the aircraft is assigned. Such airfields will be identified herein (directory section only) by the following notice: "TEMP INACTIVE. NO FACS." Above policy statement is not to be construed as countermanding any AAF Regulations or letters governing command use of municipal airports or Army airfields.

4 "CLOSED" ARMY AIRFIELDS: Under the provisions of AAF Regulation 60-23 or under specific direction of the CG, AAF, from time to time certain airfields under the jurisdiction in whole or in part of the Army Air Forces will be listed as "CLOSED": Such as, (a) Fields closed to all transient traffic except on official business or in emergency; (b) Fields that have been declared surplus to the AAF and on which permits have not been issued for civil use or which have not been otherwise disposed of by WAA. The listing "CLOSED" will appear in the directory section only. Airfields so designated will be used on official business only under written orders in each case.

CLEARANCE OF AAF AIRCRAFT: National Guard Units are not authorized to clear AAF aircraft. At bases occupied solely by National Guard, clearance for AAF aircraft will be obtained from Flight Service in accordance with provisions of paragraph 2. AAF Regulation 60-22.

✓ ARMY FOREIGN CLEARING STATIONS: Under the authority of AAF Regulation 61-4, Army aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated: AFRICA AND AZORES - Brookley Fld, Ala., MacDill Field, Fla., Washington National Arpt, D.C., or Westover Field, Mass. ALASKA - McChord Fld, Wash., or Great Falls AAF, Mont. BERMUDA - Mitchel Field,

1/ PILOT PROCEDURES WITH FLIGHT SERVICE, USING AAF MILITARY FLIGHT SERVICE COMMUNICATIONS SYSTEM (PLAN 62): (1) Departure from AAF Bases: No change. References: AAF Regulations 15-23 and 60-22. (2) Departure from non-AAF Bases: All pilots of AAF aircraft departing from a non-AAF base will file a complete flight plan, with, and when necessary secure approval from, the nearest Flight Service Center prior to take-off, or as outlined in AAF Regulation 60-22. Communication with a Flight Service Center may be established by a collect telephone call. When a telephone is not available the nearest AAF base or AACS station may be contacted by radio. After obtaining the Flight Service approval, pilots contemplating flight under Instrument Flight Rule conditions will secure a CAA Airway Traffic Control clearance. The CAA clearance normally can be obtained more rapidly by contacting CAA direct through CAA communications facilities. However, if CAA commun. facs. are not available, the CAA clearance may be obtained through Flight Service. (3) Change of Contact Flight Rule (CFR) Flight Plan Enroute: AAF aircraft requiring a change of route or point of first intended landing of a CFR flight plan enroute will contact Flight Service through an AACA airway radio station or control tower, submit the information required by AAF Regulation 60-22 and, when necessary, secure Flight Service approval. (4) Change of IFR Flight Plan, or CFR to IFR, or IFR to CFR Enroute: Any AAF aircraft requiring a change or route, altitude, point of first intended landing, cruising speed, or alternate airport, or change from CFR to IFR, or IFR to CFR, enroute will contact a CAA communications station for CAA Airway Traffic Control clearance and Flight Service approval if necessary. Pilots possessing clearance authority must furnish Flight Service their new flight plan. If communication with a CAA communications station cannot be established, an AACS airways radio station will be contacted for coordination between CAA and Flight Service and to obtain CAA Airway Traffic Control clearance and Flight Service approval when necessary. (5) CFR Position Reports: When flying under CFR conditions, pilots will make position reports, wherever practicable, to AACS airway radio stations enroute and receive any necessary advisories from Flight Service One position report each 30 minutes is considered adequate. (6) IFR Position Reports: When flying under IFR conditions, pilots will first make position reports to CAA communications stations as heretofore required by Civil Air Regulations, and then to AACS airways radio stations en route, and receive any pertinent Flight Service advisories. (7) Voice Calls: AACS airways radio stations will be called by the location name followed by the word "airways", such as "Bolling Airways". This is distinct from the CAA radio call system which uses the location name followed by the word "radio", such as "Washington Radio". (8) Arrival Reports at non-AAF Bases: Arrival reports from fields where there is no established AAF Base Operations will immediately be sent by the most expeditious means available or by a collect telephone call to the nearest Flight Service Center. (9) RON Messages: At bases not connected with Flight Service Centers by military interphone, pilots may file RON messages via long distance telephone to the Flight Service Center at the time the arrival report is filed. (10) All VHF equipped aircraft will be provided with a card to be prominently mounted near the VHF control box which will specify button, frequency, and service obtainable. An Index of AACS airways stations within the U.S., together with a listing of the assigned frequencies, may be found on pages 100 and 101 of T.O. 08-15-1. The following table displays the channels and frequencies normally used to contact the various communication installations:

Button	Frequency	Service	
A	118.1 mcs.	CAA AIRWAYS (RANGE STATIONS)	** AACS Airways
B	126.18 mcs.	CONTROL TOWERS	(Plan 62)
C	197.88 mcs.	AACS AIRWAYS (PLAN 62)	** Control Towers
D	140.58 mcs.	MILITARY EMERGENCY & GCA FINAL APPROACH CONTROL	

** Available for service indicated on a secondary basis.

(11) It will be some time before all AAF aircraft are equipped for operation on AACS airways frequencies. It is not the intent that pilots flying aircraft not so equipped attempt to make position reports to Flight Service as described above. Emergency Flight Service advisories, however, may be transmitted to such aircraft on the AAF control tower frequency. Aircraft which are equipped for operation on AACS airways frequencies will contact airways station whenever possible rather than AAF control towers. (12) The following list of telephone numbers will be used for contacting military Flight Service Centers:

CAA AREA	FLIGHT SERVICE AREA	PHONE NO.

Great Falls;Seattle	McChord Flight Service Center Tacoma, Washington	Tacoma LD-20 Tacoma LD-21

**REVISION OF ARMY FLIGHT SERVICE CENTER AREAS: The boundary between the March and Fort Worth Flight Service Areas has been moved. That part of the El Paso CAA area lying E of the following points now falls within the Fort Worth Flight Service Area; that part lying W within the March Flight Service Area: From 25 miles SE of the Clarendon Range, thence SSW to lat. 33°, long. 101°35', thence W to 33°-104°, thence S to 31°-104°, thence W to the U.S.-Mexican Border at 31°-105°24'.

IFR CLEARANCE OF ARMY AIRCRAFT: Except as outlined below, no Army aircraft will be cleared for instrument flight unless such aircraft is equipped with a low frequency radio receiver capable of reception in the 200 to 400 kc. band. The BC-1206 (Detrola) receiver is not considered adequate as regards compliance with this directive. Aircraft not so equipped may be permitted to clear under IFR when the instrument type clearance is necessitated by reduced local visibility caused by fog, smoke, or haze, or when the flight will not be conducted under conditions which will require navigation by radio.

1/ CLEARANCE OF AAF AIRCRAFT IN NEW YORK CITY AREA: In accordance with notification from Headquarters, Army Air Forces, July 2nd AAF Letter 63-9 has been rescinded and the following instructions will govern the clearance of AAF aircraft in the New York City Area: For clearance purposes into or from the New York City Area (encompassed by a 25 mile radius from the southern tip of Manhattan), CFR is defined as ceiling at least 2000' and visibility 3 miles or more; IFR when the visibility is not less than one mile and the ceiling is unlimited, or when the ceiling is not less than 5000' and the visibility not less than 2 miles. AAF aircraft flying into

the New York City Area may be cleared to any authorized field therein provided weather conditions are not less than those defined above. In all cases in-flight approval from Olmsted Flight Service Center by contacting Olmsted Airways, Rome Airways, Westover Airways, Mitchel Airways, or Ft. Dix Airways must be obtained prior to proceeding to the field of destination. All pilots whose destination is an airfield within the area will indicate on the AAF Form 23 that their flight plan to the field of destination is via any of the five stations listed. Flights for which the point of first intended landing is Mitchel Field may be made using normal clearance procedure and restrictions outlined herein are not applicable to that station. AAF aircraft engaged in regularly scheduled transport flights under the operational control of the Air Transport Command are exemot from these restrictions.

SELECTION OF WEATHER ALTERNATES BY ARMY PILOTS: In accordance with policy stated by the CG, AAF April 7, 1947, Army pilots are not to be refused IFR clearances because of selection of other than "A, N, NG, or P" fields as an alternate. The selection of an alternate airport is a planned procedure to be resorted to in case of emergency and any suitable airport, military or civilian, will be accepted for clearance purposes. Concerning this policy, it is pointed out that pilots who do utilize other than "A, N, NG, or P" fields under such circumstances may be called upon to justify their use of same.

V.H.F. CHANNEL ASSIGNMENTS:

Following are Army assignments:

Channel	Frequencies
A	116.1
B	126.18
C	137.86
D	140.58
G	137.70
H	134.10
U	108.3
V	108.7
W	109.1

Following are Navy assignments:

Channel	Frequencies
1	116.1
2	142.56
3	126.18
4	128.70
5	143.28
6	134.64
7	143.64
8	142.02
9	142.74
GUARD	140.58

ARMY DISTRESS, AND SEARCH AND RESCUE PROCEDURE: 1 When an aircraft is in distress and the pilot is unable to establish two-way communication on any frequency, he will transmit as follows: "Mayday. Mayday. Mayday. This is Army 1 2 3 4, this is Army 1 2 3 4, this is Army 1 2 3 4, my approximate position is --, Over." Pilot may follow this emergency transmission with any other information he deems necessary Although Channel "D" (140.58 mcs) has been designated as the Joint Army-Navy emergency frequency, the pilot in distress will use any or all frequencies at his disposal. Communication coverage on various frequencies will vary depending upon the location of control tower, airways, VHF/DF, and other radio stations. 2. To request escort by Air Rescue Service rescue plane when two-way communication can be established, aircraft in distress will: (a) Contact Flight Service through nearest AACS airways station. (b) Give position report; if position is not known, request QTF (Fix). (c) Give nature of trouble, also estimated time plane can remain aloft. (d) Follow instructions transmitted by Flight Service. (e) Follow instructions of Air Rescue Service aircraft after contact is accomplished. 3. To report sighting of crashed aircraft: (Note: Previously reported and identified crashes are marked with yellow paint). (a) Contact Flight Service through nearest AACS airways station. (b) Give position of crash. (c) Evidence of survivors, type and number of aircraft (if possible). (d) Follow instructions transmitted by Flight Service. (e) Immediately after landing make a complete report for transmission to the nearest Air Rescue Unit; also notify nearest Army Air Forces installation.

SERVICING FOR ARMY AIRCRAFT: Transient Army servicing is usually available at active Army airfields and, when available, is indicated in the remarks column, data section by an "S" designation (as defined under data legend) and octane ratings of gas are shown. At airports designated by a single (A) in the "Airman's Guide" (Joint use with civil interests), Army servicing is available unless remarks column carries "ARMY TEMP INACT-CIVIL FACS." Notation is given in remarks column to servicing available for military aircraft: for example, "91, 100 oct. Army". This may be contract service. As a matter of policy, limited servicing and maintenance will be available to transient military aircraft at Air National Guard Fields (on Form 15). Notation with regard to available facilities will be shown in the remarks column; for example, "91, 100 oct. NG". At (P) or civil fields, military servicing or Army contract fuel will not be available; servicing may be secured in emergency only on a Form 15. Army servicing may be procured at Navy fields on a Form 15.

CIVIL USAGE OF MILITARY FIELDS: Army and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

PERSONAL POSSESSION OF PILOT CERTIFICATE: No person shall pilot a civil aircraft within the U.S. unless he holds a valid pilot certificate with appropriate ratings issued by the Administrator or an appropriate and valid foreign pilot certificate. Such certificate shall be in the personal possession of the pilot at all times while piloting aircraft and shall be presented for examination to any inspector of the Administration or State or local law enforcement officer upon the request of such inspector or enforcement officer.

NOTICE TO ALL FLYING PERSONNEL: Because of the increase in aircraft operations, both civil and military, in recent months, the number of complaints regarding airplane noise nuisance has reached such proportions that the advancement of aviation and development of new airports are in danger of being severely retarded. To reduce the number of such complaints, it is requested that the following practices be put into effect by all fliers: (1) Discontinue all unnecessary low flying. (2) When weather and traffic volume permit, increase altitudes of all traffic patterns that require flight over inhabited areas. (3) Re-route channels of approach and departure to avoid residential and business districts whenever possible. (4) If the airport is located near inhabited areas, reduce power and increase pitch of propellers as quickly as possible during take-off so as to keep engine and propeller noises at a minimum. (5) Keep rpm's set at a minimum required operational setting when low flying over populated areas is necessary.

RADIO TELEPHONE-OPERATION AUTHORIZATION: This is the simple way in which an authorization to operate a radio telephone transmitter in an aircraft is obtained: the applicant appears in any of the Federal Communications Commission field offices, or before any CAA flight examiner of the CAA, who has been designated by the FCC to issue the permits, proves he is a United States citizen, that he has need of such an authorization, and that he understands the few simple rules and regulations. He is given a card granting the authorization then and there. FCC offices are listed under U.S Government in phone books, and there are some 30 of them throughout the country. Mostly, they are in downtown offices. There are more than 1,000 CAA designated flight examiners. Mostly they are located at airports. The "examination", if it may be so described, consists of a few questions establishing the ability of the applicant to transmit and understand spoken messages in English, and to understand the simple rules governing the use of such equipment. He is also given simple, printed instructions for its use.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges. If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flight should not be conducted on civil airways in IFR weather using VHF ranges unless the ATC clearances so authorize. (See pages 144, 145, 146 for VHF range coverage).

NEW PRIVATE FLIER VHF FREQUENCIES: All CAA Communications Stations and Towers are discontinuing receiving watches on 131.7 mcs. and 131.9 mcs. as new equipment becomes available to guard the new private flier frequencies of 122.1 mcs for transmission to CAA Communications Stations and 122.5 mcs for transmission to CAA operated towers. Practically all CAA towers now guard 122.5 mcs. but the communications station program is not fully effective yet because of non-receipt of the new receivers. CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mcs if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on one of the frequencies 118.3, 118.5, 118.7, or 118.9 mcs. in addition to towers' low frequencies. See individual data pages in the Airman's Guide for inclusion of these frequencies as commissioned.

U. S. WEATHER BROADCASTS AND TRANSMISSIONS: The time of observation for all weather reports is 30 minutes after the hour, unless otherwise announced. Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

INSTRUMENT FLIGHT, NEW YORK METROPOLITAN AREA: Revised arrival, departure, holding instrument approach and control procedures utilizing new radio aids were placed in effect in New York Metropolitan Area. Non air carrier pilots proposing instrument flight through this area or to or from Newark, Mitchel, or La Guardia Fields should write the Chief Controller, New York Air Traffic Control Center, Box 575, La Guardia Field, New York, for copies of applicable Operations Letters describing these procedures.

CFR FLIGHT PLANS, AND ARRIVAL REPORTS: CFR flight plans may be filed with any CAA airways communication station or airway traffic control center. One hour after E.T.A., if no notice of arrival is received, queries are sent out over CAA communications systems. If the arrival report is not received within three hours, search and rescue operations are initiated. Inasmuch as the Government may be put to considerable expense in determining the location of aircraft when an arrival report is not filed, it is vitally necessary that all pilots using this service make certain that notice of arrival is filed with the CAA communications station at the termination of the flight. To reduce radio congestion, pilots should file CFR flight plans, when required, in person or by telephoning the airways communication station or airway traffic control center. CAA control towers have discontinued accepting CFR flight plans for transmission and will not normally file arrival reports except upon the specific request of the pilot. Whenever practicable, however, it is desired that arrival reports be filed in the same manner as flight plans.

✓ TETRAHEDRONS: The tetrahedrons at the following airports were discontinued July 1, 1947: Atlanta Arpt, Ga., Orlando Arpt, Fla., Birmingham Arpt, Ala. Those at the following airports were leased to municipalities for maintenance and operation: Miami Arpt, Fla., West Palm Beach Arpt, Fla., Jacksonville Arpt, Fla., Tallahassee Arpt, Fla., Savannah Arpt, Ga., Charleston Arpt, S.C., Raleigh Arpt, N.C., Spartanburg Arpt, S.C., Charlotte Arpt, N.C., Winston-Salem, Arpt, N.C., Greensboro, Arpt, N.C., Nashville Arpt, Tenn., Knoxville Arpt, Tenn., Memphis Arpt., Tenn., Jackson Arpt, Miss. (7-3)

✓ MINNEAPOLIS AIR ROUTE TRAFFIC CONTROL CENTER AREA AND FLIGHT ADVISORY AREA BOUNDARIES: Effective July 22, 1947, the Chicago-Minneapolis Air Route Traffic Control Center Area Boundary on Green Civil Airway #2 was relocated from a point 25 miles SE of the La Crosse, Wis. Radio Range Station to a point 25 miles NW of the Lone Rock, Wis. Radio Range Station.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct "TO-08-15-1", dated June 18, 1947, (a) by correcting pages 95 and 97, to show that Coast Guard direction finder stations are inactive. Although CG radio communications stations listed are still in operation, direction finding service has been temporarily discontinued. (b) by amending HF/DF network listing by showing CAA direction finder at Pittsburgh, Pa. in operation. (c) by correcting pages 27 and 39, to show Brandywine radio range, as published in Vol. 2, No. 4 of Airman's Guide and subsequent issues. (d) by disregarding notice published in FO List No. 88 that Clinton County AAF GCA should be listed as transmitting on 4495 kcs. Notice appearing in List #94 with heading of Medford AAF, Calif. referred to above station. (e) by correcting page 106, GCA, so as to show Clinton Co. AAF, Ohio, transmitting on 4495 kcs. in addition to other frequencies listed. (f) by correcting pages 101, Sedalia AAF, Mo., so as to delete AACS Plan 62. Permanently discontinued. (g) by correcting page 60, so as to show Radio Range Station Class for Myrtle Beach, S.C., as BMRAZ. Bearing to field from range 69° mag. to rnwy #7 in place of rnwy #8. (h) by correcting page 110, Special Notices, Standard VHF Crystallization, AAF Aircraft Receivers, so as to show Channel H on 134.10 mcs. (i) by correcting page 106, Army GCA, Westover Field, Mass., as follows: Frequencies: Transmits: VHF, 116.1 mcs., HF, 3117.5 kcs. Receives: VHF, 116.1 mcs., 1500 to 18000 kcs, 200 to 400 kcs. Remarks: Cont. during IFR; 30 min. notice other times. (j) by correcting page 106, Army GCA, Andrews Field, Md. as follows: Frequencies: Transmits: VHF, 116.1 mcs, HF, 3117.5 kcs.; Receives: VHF, 116.1 mcs., 1500 to 18000 kcs, 3106, 4495, 6210 kcs. Remarks: Guards 116.1; cont. during IFR; 0800-1700 daily, and on 30 min. notice other times.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elevation	Action Taken
Point-Adams, Ore.	Supp. Weather			Closed
Willipa Bay, Wash.	Supp. Weather			Closed
Grays Harbor, Wash.	Supp. Weather			Closed
Auburn, Calif. (Int.)	Hourly			Discont. 6-25-47
San Pedro, Calif. (Term. Isl. NAS)	Hourly			Closed
Baker, Ore.	6-Hourly			Closed
Carbondale, Ill.	6-Hourly			Closed
Eau Claire, Wis., Arpt.	Supp. Weather	44-52, 91-29	885'	Established
Mt. Vernon, Ill.	6-Hourly	38-20, 88-52	463'	Established
Banana River, Fla. (NAS)	SW, Pibal, Raob			Closed
Topeka, Kans.	Hourly			Closed
Snow Hill, Md.	3-Hourly			Discontinued
San Nicolas Island, Calif.	SW	33-15, 119-31	893'	Began
Gallup, N.M. (Gallup City Arpt)	SW	35-31, 108-47	6500'	Established
Valle , Ariz. (Valle Arpt)	SW	35-39, 112-10	5990'	Established
Longview, Tex. (Gregg Co.)	SW	32-24, 94-43	365'	Established

NOTE: Airway terminal forecasts inaugurated for Longview, Tex. and Wilkes-Barre (Avoca), Pa. (Wilkes-Barre-Scranton Airport). Airway terminal forecasts now available for Bozeman, Mont.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage

in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Army Air Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT TRAFFIC CONTROL PROCEDURES: (a) Planes with two-way radio should establish communication with control tower when 15 miles from the airport of destination and before taxiing or taking off. (b) Planes without receivers, when approaching tower-controlled fields, and before taxiing and taking off, should be on the alert for and be guided by light gun signals. (See AAF Regulation 100-4, dated March 4, 1944, and CAR Digest of Manual 60). (c) Flashing tetrahedron lights, as well as the daylight operation of rotating beacons, indicate suspension of CFR traffic.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

FOREIGN DATA

SPECIAL NOTICES

FOREIGN ENTRY PROCEDURES, AIRPORTS OF ENTRY, CUSTOMS REPORTS, CIVIL AIRCRAFT CLEARANCE FOR FOREIGN COUNTRIES: These procedures and regulations were all incorporated into the Flight Information Manual, Volume 2, No. 1, dated July 1, 1947. Only amendments to the data contained in the Manual will hereafter be carried in the "Airman's Guide"

UNITED KINGDOM MILITARY AIR BASE USAGE: The following United Kingdom military air bases are available to civil air carriers of only U.S. and United Kingdom and to aircraft which were purchased in either the United States or the United Kingdom and are in ferry status: (a) For regular use: Kindley Field, Bermuda; Beane Field, St. Lucia; Coolidge Field, Antigua; and Atkinson Field, British Guiana; (b) For alternate use: Waller Field, Trinidad; Vernam Field, Jamaica; and Carlsen Field, Trinidad. Even though the above fields are open to civil air carriers and ferry status planes it is mandatory that the operators of such aircraft secure approval for use of these military air bases from Headquarters, AAF, Washington, D.C., prior to the departure of each flight or series of flights.

CAUTION ADVISED IN USE OF GUATEMALA-HONDURAS AREA AERONAUTICAL CHART: Flight checks have revealed that elevations indicated on Gulf of Fonseca (710) Aeronautical Chart covering the Guatemala-Honduras-Nicaragua Area, dated December 1946, are as much as 4300 feet too low. This chart base is being thoroughly rechecked and a new chart will be issued as soon as possible.

TRANSMISSION OF INTERNATIONAL NOTAMS: Effective May 10, 1947, the transmission of international notams to Service A circuits by WSY New York was discontinued. Offices desiring receipt of this material should obtain receiving drops on the Service O system.

✓ INTERNATIONAL RADIOTELETYPE CIRCUITS: Effective May 16, 1947, WFM Lagnes, Azores permanently decommissioned. The following radioteletype circuits are established and in operation at CSY Santa Maria; WSY New York; EIP Shannon, FXO Paris; NHY Port Lyautey. Inter-island radioteletype link CSY Santa Maria to WYQY Lagnes will be continued until further advised. All above circuits are operating in accordance with ICAO Communications Procedures.

NAVAL COMMUNICATIONS WITH COMMERCIAL AIRCRAFT IN CARIBBEAN AREA: Effective March 24, 1947, and until further notice, San Juan NAS, Trinidad NAS, Guantanamo NAS guard 6515 kcs voice continuously, transmitting and receiving, for communications with commercial aircraft.

LORAN RATE RELOCATED: "Frederick Dahl Loran Rate 1L4" shifted to new operations building June 23, 1947. This change involved new antennas, Transmitter, times, and transmission lines. A Loran System error may develop.

AFRICA-Casablanca, Africa: The following established circuits are now in operation at CNO Casablanca Aeronautical communication station: CSZ Lisbon, FXW Bordeau, FOO Paris, CNC Tangier, CNS Gaercife, CNA Fez, CNV Oujda, CNU Meknes, FOR Oran, FNA Algiers, CNN Taza, CNZ Fort Trinquet, CNY Tindouf, CND Agadir, CNX Marrekech. FOK Dakar. Landline teletype to FFAG Algiers and CNPL Port Lyautey. Guards Route C radiotelegraph frequencies 3248, 6563, 8538, and 12776 kcs. Additional air ground guards 333, 336, 6510, 4195 kcs. Radio range and beacon identification "KR", 222 and 403 kcs. respectively. Tower voice VHF 116.1 mcs. and 6440 kcs.

Dakar, Africa: Effective May 15, 1947, Overseas Foreign Aeronautical Communications Station WFG, YOFF Airport, Dakar FWA, will be combined with FOK under call sign FOK. Following CAA circuits will be operated and supervised by French Nationals: A/G 3285, 6563 kcs. cont., 11319 kcs. daylight hours, point-to-point circuits, FOK/WFH Port Lyautey, FOK/ELPA Roberts Field, FOK/ZVJ Recife, FOK/ZNT Accra. Following principal circuits operation and supervision French Nationals: Point-to-point, FOK with following stations, CNB Casablanca, X 08 Natal, FOO Paris, FGS Abidjan, FNA Algiers, FSP Port Etienne, FMW Port Au France, FHK Amsterdam. Yoff Tower, range and beacon operation and supervision French Nationals, frequencies unchanged.

Dakar Weather Broadcast: Effective 0820Z GCT, March 24, 1947, station WFG commenced broadcasting Dakar METAR hourly at 20 minutes past each hour on 3289 kcs., A1 emission.

Port Lyautey Communications: Effective June 11, 1947, circuit operations NHY Port Lyautey to FOK Dakar and CSZ Lisbon were transferred to station CNO Casablanca. Following civil circuit functions remain in operation NHY Port Lyautey: Circuit 207T Port Lyautey-Santa Maria. Circuit 224 Port Lyautey-Roberts Field, Liberia. 24 hour landline teletype operations connecting NHY Port Lyautey and CNO Casablanca facilitates E and W traffic movements via 207T. Port Lyautey maintains continuous civil air ground guards 3285, 6563 kcs, 11319 kcs. from 0700 until 2200 GCT. Additional civil air ground guards 8554, 6543, 6523 kcs. upon request.

✓ AZORES-Fayal-Radio: Radio beacon call sign CTN. Operates on 333 kcs. days and on req. Air to ground call sign CTN for emergency use only on 6563 and 6577 kcs.

Florez-Radio: Radio Beacon call sign CF operates from 00 to 05, from 20 to 25 and from 40 to 45. Reliable for Homing.

Lagens-Radio: Tower operating on 116.1, 126.18 mcs. and 2834, 2993 kcs. for continuous transmitting and receiving. Tower on 4220 kcs. for emerg. and on 5000 kcs on req. GP range on 341 kcs in cont. operation with legs of 343° and 163° mag. reliable for instrument letdowns if caution is used. DK radio range on 288 kcs on cont. operation with legs of 343° and 163° mag., reliable for instrument letdowns if caution is used. Z markers are operating on both ranges. Racon beacon inoperative until further notice. SCS-51 operates cont. between 1730 and 0900Z and on 30 min. req. thereafter on channel Y for runway 16 and channel X for rnwy 34 if no glide path operating on channel Y. Localizers not modified in accordance with Technical Order 16-1-62. Long range DF on 6563

kcs day and night transmitting and receiving and receives fixing signal on 6210 kcs call sign is CSE9. Shore range DF call sign CSE7 on 4575 kcs operating on req. from Lagens tower or CSY at Santa Maria. GCA operates on one hour request on all voice frequencies. Field: Crews inbound to Lagens will be cautioned of high terrain on E and W sides of rnwy 34. Due to repairs being made on 2700' on the N end of rnwys 16/34, no GCA landing will be made on rnwy 16 until further notice.

Santa Ana-Radio: Radio Beacon call sign BB7 operates cont. on 308 kcs.

Santa Maria-Radio: Tower transmits and receives on 116.8 and 126.18 mcs and 2834 kcs. Tower transmits on 278 kcs. and guards 6440 kcs. Radio range operates cont. on 249 kcs. Call sign WY. Radio Beacon operates on 329 kcs, call sign WY. No Z marker on WY range. SCS-51 localizer on channel X on rnwy 19 operates cont. Glide path has resumed operation. Localizer not modified in accordance with T.O. on 6-1-62. Santa Airways operates on 3093 kcs cont. and on 4220 kcs in emerg. Air to ground call sign CSY operates cont. on 6563, 12776, 3248, and 8538 kcs on CW. CSY is ICAO control center for the Azores. All letdowns are to be made on the N and S legs of the WY range.

BELGIUM-Brussels: ONBU reports as from July 1, 1947, the Queen Code ICAO document 2560 will be used by all the Belgian Stations.

BRITISH HONDURAS-Belize, Landing of Private Aircraft: Aircraft intending to land at Belize Airport or on the Belize waterfront should give the Director of Aviation, Belize, British Honduras, at least 4 hours' advance notice of their intended arrival. Flight plans may be filed for transmission to Belize between the hours of 1400Z and 2400Z through MIAMI CAA-operated overseas foreign aeronautical communications stn.

BRITISH WEST INDIES-Kingston, Jamaica-Montego Bay Airport: Montego Bay Arpt. is a British-controlled airport now under limited operation by Pan American Airways. It is necessary for all flights departing from Montego Bay for points in the U.S. to file flight plans with the Kingston ATC through the Kingston Communications Station - call letters MRX. Flight plans also must be filed for all flights departing from U.S. for Montego Bay. They may be filed for transmission to Montego Bay through the CAA-operated Overseas Foreign Aeronautical Communications Station at Miami - call letters WBR, or New Orleans - call letters WEK.

Kingston, Jamaica-Palisadoes Airport Facilities: The Palisadoes Airport is a British Government controlled airport. The Government controlled tower transmits on 397 kcs only, and guards 2870, 3105, 6210 kcs. It is necessary for all itinerant flights coming to Palisadoes to file Flight Plans from point of departure to the Communications Station at Kingston - call letters MRX. This Flight Plan should be marked for Information: Palisadoes Airway Traffic Control. The route frequency of 6515 kcs. A3 emission is guarded at MRX. They have a good signal on this frequency and can be read consistently throughout the day and night in the Caribbean Area. Flight Plans may be filed for transmission to Palisadoes through the CAA-operated Overseas Foreign Aeronautical Communications Station, SBR, Miami.

Trinidad NAS: Effective June 16, 1947, Navy Squadron commenced conducting aerial gunnery from 1300Z to 2000Z daily except Sat. and Sun. until further notice. Surface craft and aircraft remain clear of area 10° N, 60°45' W, 10°30', 60°45', 10° N, 60° W, 10°30', 60°. The marine radiobeacon at Trinidad was discontinued July 10, 1947.

CANADA-Blissville-Radio: Stn now gds 3105, 3117.5,4495,6210 kcs. (7-1)

Cartierville, P.Q.-Radio: Twr now operates 0700-2100E. (7-1)

Fort William, Ont.-Radio: NW and SE courses of range realigned to 332° N and 136° N. (7-1)

Lethbridge, Alta.: Correct elev of Lethbridge Airport is 3030'. (7-1)

Moncton, N.B.: Effective July 15, 1947, the following changes apply to air ground services offered by stations CYA Moncton: Moncton CYA will maintain standby watch only on freqs. 6563, 6577, 8538, 11319 kcs. from 1300 to 2000Z daily and on 3248, 3285, 6563, 6577 kcs from 2000Z to 1300Z daily and will transmit on above frequencies only: (a) when called by aircraft; (b) on request OATC CFMO; (c) on request VOAC Vega.

Montreal, P.Q.-Dorval: Effective July 15, 1947, the following changes apply to air ground services offered by station CYB Dorval: Dorval CYB will maintain cont. watch and transmit on frequencies 3248, 6563, 8538, 12776 kcs. only.

Prince George, B.C.-Radio: SE range course realigned to 327° A. (7-1)

Sarnia, Ont.-Radio: Stn now operates cont. (7-1)

Sioux Lookout, Ont.-Radio: SE range course realigned to 312° A. (7-1)

The Pas, Man.-Radio: Stn now gds 3105, 4495, 6210 kcs. (7-1)

Toronto, Ont.-Radio: NW rng course realigned to 142° N. (7-1)

Vancouver, B.C.-Radio: Stn discont. transmitting on 116.1 mcs. (7-1)

Vermilion, Alta.-Radio: Stn now gds 3105, 3117.5, 6210 kcs. (7-1)

Wiarton, Ont.-Radio: Rng without voice comm. at lat. 44-42-15 N, 81-10-30 W Var. 7° W. Class: RAW. Rdo call "VFCF". Ident. "VV". Courses 148N, 235A, 322N,52A. Freq. 326 kcs. Bear. and dist. 53°, 4.5 mi. Arpt. elev. 729'. (7-1)

CUBA-Havana, Rancho Boyeros Airport: Effective May 19, 1947, and until further notice, all aircraft operating into and out of the Rancho Boyeros Airport must file a flight plan prior to entering the area. This applies to both IFR and CFR flights. Form of flight plan as follows: Identification; type; route of flight, time of flight departure, time of minutes, altitude, CFR or IFR indicated by C or N respectively and alternate if necessary. Example: NC60459 DC3 Miami Havana 1230 92/60N KW. For trial period and until further advised all flight plans except Expreso and those presently using PAA communications facilities may be forwarded through WBR addressed to OAHAV at no charge.

GREECE-Hassani Airport, Athens, Greece Radio Call: Effective April 30, 1947, call sign WWJC replaced Army call sign WUCW on all circuits formerly using call signs at this station.

LABRADOR-Goose-Radio: DF stn coordinates: 53-20N, 60-25W. Var. 35° W Rdo call now "VOAV". Rcvg watch on 11319 kcs discont. (7-1)

Goose Bay: Effective July 15, 1947, the following changes apply to air ground services offered by station VOAV Goose Bay: Goose Bay VOAV will maintain cont. watch and transmit on frequencies 3248, 6563, 8538, 12776 kcs., but with frequencies 3285,6577 kcs (receive and transmit) available on request.

Gore Bay-Radio: Rng without voice comm at lat 45-55-30N, long. 82-36-45W. Var. 6° W. Class: RAW. Rdo call ' VFBH". Ident. "ZE". Courses: 250A, 328N, 60A,121N. Freq. 245 kcs. Bear. and dist., 145°, 4.2 mi. Opers on req. Arpt. elev. 637'. (7-1)

MEXICO-Mexican Entry Fees: At Mexican Airports of Entry, charges include an overtime fee of 30 pesos after 12 noon for Immigration Inspection and a fee based on a full day's wage for each inspector involved for each 3 hours of overtime or fraction thereof after 2 p.m. for a Customs Inspection. Charges may also be made for a Customs guard to watch the plane and for the taxi fare to bring inspectors to the field after 12 noon. In American money total fees may approximate $15 to $20.

NEWFOUNDLAND-Military and Naval Landings: All military and naval aircraft landing in Newfoundland should use Harmon Field at Stephenville or Naval Operating Base at Argentia. Gander has very limited military facilities and is reserved for commercial and weather diverted military aircraft.

Gander: Gander Metar weather broadcast now in operation on 363 and 5410 kc. simultaneously at hour plus 20 min. and hour plus 50 min. Reception reports on 5410 kc. requested. Effective immediately the dewpoint will be added as a remark at the end of the Metar for Gander, Stephenville, Sydney, and Moncton broadcast by VOAC on 5410 and 363 kcs. at hour plus 20 and hour plus 50. Example: D.P. 47. Tele VOGA.

Torbay Airport: Torbay Airport open to traffic between hours of 1030Z and 0230Z. No acft will be dispatched to arrive at Torbay between hours of 0230Z and 1030Z. No traffic will be available between landing and take off minimums of 1930Z and 1030Z. Landings and take offs minimums as published in ATLD Amendment No. 16 "Mile visibility, take off night 800' 1 mi. visibility, landing day 800' 1 mi. visibility, landing night 800' 3 mi. visibility",

PACIFIC OCEAN-Weather Station Communications: Effective July 1, 1947, Pacific Ocean Weather Station FOX discontinued use of 4220 kcs for voice communications with trans-Pacific aircraft and substituted 5165 kcs for this purpose. The following paragraphs of SOP-1-A should be changed in accordance with the above: Section IV: 4 (a); 4 (b); 5 (a) (5); 5 (b); 5 (c) (1); 7 (a).

Pacific ICAO Procedures: International Civil Aviation Organization Airway Traffic Control and Communication Procedures will be placed into effect in the Eastern Pacific effective August 1, 1947.

PUERTO RICO-Caguas: Radio antenna tower under construction unlgtd until further notice. Height 150' located one and one quarter miles N of Caguas at lat. 18-15-20 N, long 66-1-53 W.

Isla Grande Airport (San Juan)-Designated an Airport of Entry (7-2)

Losey Field (Ponce): E/W rnwy under repair. Caution - men and equip. on fld. (7-16)

Mayguez Airport: Caution - do not use taxi strip W of Terminal Bldg until further notice. Men and equipment on fld. (7-17)

San Juan Seadrome Landing Lights: Effective June 9, 1947, the seadrome landing lights were discontinued and the landing light buoys were removed from the bay of San Juan at the San Juan NAS.

San Juan Pre-Flight Clearances: San Juan Civil Air Terminal (U.S. NAS), Isla Grande Airport, San Juan - All civil operations at San Juan Air Terminal were assumed by the Puerto Rico Transportation Authority effective March 4, 1947. Authority must be obtained for landings at this airport prior to the commencement of any flight. Address requests to Airports Division, Box 3508, San Juan, P.R. Cable address is "Autoritan".

San Juan NAS: Effective June 21, 1947, repairs to runway were completed. Runway was restored to normal length of 5330'.

URUGUAY-National Airport, Carrasco: Effective June 15, 1947, Air Traffic Control Tower at National Airport, Carrasco discontinued its frequency of 2870 kcs., and new frequency of 278 kcs. was commissioned. (6-3)

DOMESTIC DATA

[redacted]: ALA-TENN-GA ARPT (BRIDGEPORT)-Ctn in wet weather. (5-22)
ALBERTVILLE ARPT-SW side of strip soft, rough and washing. Soft in spots in wet weather. (4-29)
ALLENPORT ARPT (MONTGOMERY)-Muddy after rains. Use with ctn. (5-22)
ANDALUSIA ARPT-Bare in spots. Ctn in wet weather. (5-22)
ANNISTON ARPT-Ends of strips soft in wet weather. (4-29)
ATHENS ARPT-Ctn in wet weather. (5-22)
ATMORE FLYING SERVICE-1800' strip muddy when wet. (7-18)
ATMORE INT, SITE 16, NO-AG-Emerg. use only. (5-22)
BARIN NAAS EAST & WEST FLDS (FOLEY)-Closed to trans acft. (5-6)
BATES FLD (MOBILE)-RADIO: Twr equipped to transmit on and guard 121.9 mcs for mobile gnd traffic. (5-18)
BEAVER DAM FLD (DECATUR)-Soft after rainy weather. (5-22)
BIRMINGHAM ARPT-Closed to civil acft not equipped with operating rcvr. Landing on sod areas approved by twr in dry weather, unsafe in wet weather. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. Tetrahedron wind indicator lctd E end E/W rnwy to be discont soon. (7-1)

[redacted]: ARCHER-RADIO: FM will be decomm concurrent with comm of Cheyenne ILS. (7-11)
CHEYENNE-RADIO: Soon, Hillsdale VHF bone-shaped FM will be comm at lat 41-09-30, long. 104-31-30, 16.2 mi E of Cheyenne low freq rng, ident one dash.
CHEYENNE ARPT-RADIO: CAA ILS will be comm soon. Voice equipped lclzr on 110.3 mcs, ident. "CX". Transmitter lctd 457' W of the W end of the E/W rnwy. Mag heading for landing: 262°. Glide path on 335 mcs, lctd 982' W of approach end and 400' S of centerline of E/W rnwy. Middle mrkr lctd 3461' E from approach end E/W rnwy, keyed alt dots and dashes; outer mrkr 32,274' E from approach end E/W rnwy, keyed 2 dashes. Middle compass lctr on 230 kcs, ident "X", outer compass lctr on 260 kcs, ident. "C". FLD: Equip. on fld days. Lgtd bldg between E/W rnwy and taxi strip, 1000' from E end. (7-7)
JACKSON MUN. ARPT-Cattle on fld intermittently. (6-13)
RAWLINS ARPT-Equip. on rnwys. (4-17)
ROCK SPRINGS MUN. ARPT-Use rnwys, taxiways only, bal fld unsafe-const. Equip. on fld. Glide path bldg 400' S and 750' from E end E/W rnwy. (7-8)
SHERIDAN CO. ARPT-N/S rnwy unsafe heavy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. Ctc Sheridan rdo for fld lgts. (2-6)
WARDWELL FLD (CASPER)-Use rnwys, taxi strips only, bal fld rough. 40' unlgtd pole erected at 30 million candle pwr ceilometer projector 1000' N of hangar. (4-8)
WORLAND ARPT-Strips under const. Equip. on strips days. Use with ctn. (5-21)

RADIO FACILITY CHARTS
U.S. COAST & GEODETIC SURVEY
DEPARTMENT OF COMMERCE

The U.S. Coast and Geodetic Survey of the Department of Commerce publishes a series of radio facility charts covering the entire United States. There are forty-two separate charts comprising the RF series, reproduced on standard page size paper measuring 8 x 10-1/2 inches, with a margin allowed for binding. These charts provide complete radio information to facilitate the planning and execution of cross-country flights in the United States and were developed by the Survey at the specific request of the Air Transport Association which represents commercial airlines operating in domestic areas. The latest advancement in depicting a special type of information necessary for aeronautical operations by use of radio facilities is reflected by the charts, which are widely used by commercial, private, and military airmen.

The charts are printed in green and magenta on a white background. The data reproduced from the green plate include the projection, scale, and a minimum of terrain features such as shorelines and major rivers. The civil airways - classified as to type - showing main safe altitudes and with mileage indicated between designated radio fixes are also showin in green. Magenta is employed to show all radio facility data, including radio ranges, beacons, radio served airports, bearings, and frequencies. The complete radio facility information for the United States, provided by these charts, is similar to the data published in the Airman's Guide.
